Through the NSE Foundation (the “**Foundation**”), we drive inclusive and sustainable development across identified CSR focus areas including primary education, elder care, sanitation and safe drinking water, health and nutrition, environmental sustainability, skill development and entrepreneurship. We recognise that the economic and social well-being of communities is intrinsically linked with environmental sustainability, and accordingly, our CSR approach adopts an integrated social, economic, and environmental perspective to create sustainable and inclusive impact. We partner on CSR initiatives with partner organisations that are committed towards our community development objectives. Our CSR team coordinates our CSR initiatives on a periodic basis, and we have commissioned third-party agencies for the monitoring and evaluation of our CSR initiatives. Recognising the shortage of quality healthcare facilities in underserved regions and the potential for long-term, scalable impact, we have prioritised capital-intensive healthcare infrastructure projects capable of serving large beneficiary populations. In Fiscal 2026, our CSR portfolio was further expanded to include investment in sports infrastructure.

Our corporate social responsibility expenditure was nil, ₹6.70 million, ₹2,294.99 million, ₹1,748.82 million and ₹1,462.46 million in the three months period ended June 30, 2026 and June 30, 2025, and in Fiscals 2026, 2025 and 2024, respectively. Our key CSR initiatives over Fiscals 2024 to 2026 and the three months period ended June 30, 2026 include:

- **Healthcare Infrastructure Development.** Our flagship initiative is the NSE Multispecialty Hospital Block and Bone Marrow Transplant Centre in collaboration with a leading cancer hospital and institution of eminence, which is designed to strengthen specialised cancer care infrastructure and enhance access to advanced treatment facilities for patients from across the country. Through this partnership, a multispecialty OPD block will be constructed, providing general as well as super-specialty services for the treatment of co-morbidities in cancer patients. We have also supported the development and upgradation of healthcare infrastructure across multiple institutions, including operation theatres, critical care facilities, hospital wards and specialised outpatient facilities aimed at improving access to quality healthcare services in underserved regions.
- **Education, Skilling and Livelihoods.** The Foundation supports initiatives focused on improving educational access, strengthening livelihood opportunities, promoting entrepreneurship, supporting self-help groups, enhancing financial inclusion and creating pathways for sustainable income generation among vulnerable communities.
- **Innovation and Research.** We have extended support to leading academic and research institutions for the development and deployment of indigenous healthcare technologies and innovative medical devices with the potential to improve affordability and accessibility of healthcare services.
- **High-Altitude High-Performance Training Centres.** In partnership with the Ministry of Youth Affairs and Sports, the Foundation has initiated the development of High-Altitude High-Performance Training Centres aimed at strengthening India’s elite athlete development ecosystem. These facilities will support advanced sports science interventions and specialised training methodologies to enhance India’s competitiveness at international sporting events.

The Foundation follows a robust monitoring and evaluation framework to ensure transparency, accountability and effective utilisation of CSR resources. Independent monitoring and evaluation agencies with relevant sector expertise oversee programme implementation and assess outcomes to ensure achievement of intended social impact.

The GoI, through a notification dated May 27, 2026, amended the Companies Act, 2013 to include subscription to zero coupon zero principal instruments (“ZCZPs”) on the SSE as an eligible CSR activity. This amendment enables corporates to deploy their CSR funds by subscribing to ZCZPs issued by non-profit organisations registered on our SSE, thereby expanding the avenues for funding non-profit organisations through our platform. The SSE also provides corporates with an additional avenue to deploy corporate social responsibility (“CSR”) funds, with up to 10% of a company’s CSR obligation permitted to be channelled through SSE-registered entities.

### **I. Industry Specific Regulations**

#### ***Securities and Exchange Board of India Act, 1992 (the “SEBI Act”)***

The SEBI Act, and the rules, regulations, circulars and notifications framed thereunder, is the main legislation governing the activities in relation to the securities markets in India. The SEBI Act was enacted to provide for the establishment of SEBI whose function is to protect the interests of investors in securities and to promote the development of, and to regulate, the securities market in India. The SEBI Act also provides for the registration and regulation of the function of various market intermediaries including stock brokers, merchant bankers/underwriters, Mutual Funds, portfolio managers, alternative investment funds, investment advisers. Pursuant to the SEBI Act, SEBI has formulated various rules and regulations to govern the powers, functions and working of these intermediaries. SEBI also issues various circulars, notifications and guidelines from time to time, amongst other things, in accordance with the powers vested with it under the SEBI Act. SEBI has the power to impose penalties under the SEBI Act and the regulations made thereunder including suspending or cancelling the certificate of registration of an intermediary and initiating prosecution under the SEBI Act. Further, SEBI has the power to call for information, undertake inspection, conduct enquiries and audits of the stock exchanges, Mutual Funds, other persons associated with the securities market, intermediaries and self-regulatory organisations in the securities market.

#### ***Securities Contract (Regulation) Act, 1956 (the “SCRA”)***

In relation to the stock exchanges, the SCRA, *inter alia*, deals with the recognition, corporatisation and demutualisation, authority of the stock exchanges to make and amend bye-laws, the authority of SEBI to amend and direct certain laws relating to and conditions relating to listing and delisting of securities. Under the SCRA, any stock exchange seeking recognition may make an application to SEBI. SEBI is empowered to grant recognition to a stock exchange, subject to satisfaction of certain conditions including the rules and bye-laws of the stock exchange being in conformity with prescribed conditions and it is in the interest of trade and in public interest to grant such recognition. All stock exchanges are required to be corporatised and demutualised in accordance with the provisions of SCRA. Further, the SCRA empowers a recognised stock exchange to make rules and amend the same, subject to the approval of SEBI and publication of the same in the official gazette, for matters such as restriction of voting rights to members only in respect of any matter placed before the stock exchange at any meeting, regulation of voting rights in respect of any matter placed before the stock exchange at any meeting so that each member may be entitled to have one vote only, irrespective of their share of the paid-up equity capital of the stock exchange, restriction on the right of a member to appoint another person as his proxy to attend and vote at a meeting of the stock exchange, and other incidental, consequential and supplementary matters.

The SCRA also empowers a recognised stock exchange, subject to the previous approval of SEBI, to make bye-laws for regulation and control of contracts. Such bye-laws may *inter alia* provide for the following: a) the opening and closing of markets and the regulation of the hours of trade; b) a clearing house for the periodical settlement of contracts and differences thereunder, the delivery of and payment for securities, the passing on of delivery orders and the regulation and maintenance of such clearing house; c) the regulation or prohibition of blank transfers; d) the number and classes of contracts in respect of which settlements should be made or differences paid through the clearing house; e) the regulation, or prohibition of budlas or carry-over facilities; f) the fixing, altering or postponing of days for settlements; g) the determination and declaration of market rates, including the opening, closing highest and lowest rates for securities; h) the method and procedure for the settlement of claims or disputes, including settlement by arbitration; i) the levy and recovery of fees, fines and penalties; j) the regulation of dealings by members for their own account; k) the separation of the functions of jobbers and brokers; l) the terms, conditions and incidents of contracts, including the prescription of margin requirements, if any, and conditions relating thereto, and the forms of contracts in writing; and m) the limitations on the volume of trade done by any individual member in exceptional circumstances.

Under the provisions of the SCRA, SEBI has the authority to withdraw the recognition granted to a stock exchange in

the interest of trade or public interest, subject to the condition that the withdrawal of recognition must not affect the validity of any contract entered into or made before the date of the notification of withdrawal. SEBI is also empowered under the SCRA to suspend the business of recognised stock exchanges, if it is of the opinion that an emergency has arisen, accordingly for the purpose of meeting the emergency it can by notification in the official gazette, by stating reasons therein, direct a recognised stock exchange to suspend of its business for such period not exceeding seven days and subject to such conditions as may be specified in the notification, and, if, in the opinion of SEBI, the interest of the trade or the public interest requires that the period should be extended, it may, by similar notification extend the said period from time to time. Further, SEBI is empowered to call upon a recognised stock exchange to furnish in writing explanations relating to the affairs of a recognised stock exchange, declare contracts in certain areas illegal in certain specific circumstances and prohibit contracts in certain cases. The provisions of the SCRA, also enables SEBI to make enquiries and issue directions to prevent the affairs of any recognised stock exchange, being conducted in a manner detrimental to the interests of investors or securities market or to secure the proper management of any stock exchange. SEBI is also empowered to direct that rules be made and also make rules applicable on stock exchanges.

Every recognised stock exchange is under an obligation to furnish to SEBI within specified timelines, such periodical returns relating to its affairs as is prescribed under SCRA and annual reports consisting particulars as may be prescribed. The recognised stock exchange and its members are also obligated to maintain and preserve books of accounts and other documents as prescribed for a period not exceeding five years. The SCRA also provides for various penalty provisions, including penalty on a recognised stock exchange, wherein a penalty may be imposed by SEBI if it fails or neglects to furnish periodical returns or furnishes false, incorrect or incomplete periodical returns to SEBI or fails or neglects to make or amend its rules or bye-laws as may be directed by SEBI or fails to comply with directions issued by SEBI. The SCRA was amended by virtue of the Finance Act, 2018 empowering SEBI to impose a minimum fine of five crores and a maximum fine of twenty five crores or three times the amount of gains made out of such failure, whichever is higher, in the event a stock exchange fails to conduct its business with its members or any issuers or its agent or any person associated with the securities markets in a manner not in accordance with the rules or regulations made by SEBI.

The Securities Markets Code Bill, 2025 (“**SMC Code**”), introduced in the Lok Sabha on December 18, 2025, seeks to repeal and consolidate the SEBI Act, Securities Contracts (Regulation) Act, 1956, and the Depositories Act, 1996, into a principle-based framework for India’s securities market. The SMC Code strengthens SEBI as the primary regulator by transferring concurrent central government powers to SEBI by order published in the official gazette, whilst introducing significant checks and balances, *inter alia*, including strict separation of investigation, adjudication and settlement functions, proportionality requirements and natural justice obligations. Additionally, it mandates registration requirements for Market Infrastructure Institutions to carry out business in the security markets and provides for the regulation and control of contracts and code of conduct of its members and market participants. As on the date of this Red Herring Prospectus, the SMC Code has not received assent from the President.

***The Securities Contracts (Regulation) (Stock Exchanges and Clearing Corporations) Regulations, 2018, as amended (“SECC Regulations”)***

Additionally, no trading or clearing member, or their associates and agents, may sit on any such governing board, and voting on any board resolution is only valid where the number of public interest directors casting a vote equal or exceeds the number of non-independent directors who have voted. Lastly, public interest directors are appointed for an initial term of three years, extendable by a further three years subject to a performance review as specified by SEBI.

***Ownership and shareholding norms:*** The SECC Regulations specify minimum net-worth requirements for stock exchanges, mandating ₹ 100 (One Hundred) crores as minimum net worth for stock exchanges, at all times. Public shareholding in stock exchanges must be at least 51% of the paid-up equity share capital. Shareholding limits are imposed on resident and non-resident investors, including a cap of 5% for individual residents (except certain institutional investors who may hold up to 15%) and 5% for persons resident outside India. In addition, the combined holding of all persons resident outside India in the paid-up equity share capital of a recognised stock exchange should not exceed, at any time, 49% of its total paid-up equity share capital, subject to any limits as may be prescribed by the Central Government from time to time. ***(ii) Functional and presentation currency***

These Restated Consolidated Financial Information have been prepared in Indian Rupee (₹) which is the functional and presentation currency of the Group.

***(iii) Basis of measurement***

The Restated Consolidated Financial Information have been prepared on a historical cost basis, except as disclosed in the accounting policies below:

- certain financial assets and liabilities that are measured at fair value,
- defined benefit plans - plan assets measured at fair value, and
- assets held for sale – measured at fair value less cost to sell.

Fair value is the price that would be received on sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group considers the characteristics of the asset or liability which market participants would consider when pricing the asset or liability at the measurement date.

**NATIONAL STOCK EXCHANGE OF INDIA LIMITED**  
**Annexure V - Notes to the Restated Consolidated Financial Information**  
**(₹ in million, unless otherwise stated)**

The Group follows the fair value hierarchy for financial reporting purposes. Fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and

Level 3 inputs are unobservable inputs for the asset or liability.

**(b) Critical accounting estimates and judgements**

The preparation of Restated Consolidated Financial Information in conformity with the recognition and measurement principles of Ind AS requires the use of accounting estimates and judgements that affect the reported balances of assets and liabilities, disclosures of contingent liabilities as at the date of Restated Consolidated Financial Information and the reported amounts of income and expenses for the periods presented. Estimates and judgements are based on historical experience and other factors, including expectations of future events that may have a financial impact on the Group and that are believed to be reasonable under the circumstances.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised, and future periods are affected.

Critical accounting estimates require consideration of higher degree of judgement or complexity, and of items which are more likely to be materially adjusted due to estimates and assumptions turning out to be different than those originally assessed. Actual results may differ from these estimates.

Detailed information about each of these estimates and judgements is included in relevant notes together with information about the basis of calculation for each affected line item in the Restated Consolidated Financial Information.

**The areas involving critical estimates or judgements are:**

**(c) Revenue recognition**

The Group recognises the revenue in accordance with Ind AS 115 - Revenue from Contracts with customers. The Group derives revenue primarily from trading services mainly in the form of transaction charges, listing fee, book building fee, processing fee, data centre- rack charges, data connectivity charges, online data feed and terminal charges, index licensing and data subscription fee, clearing and settlement services, etc. Revenue is recognised upon transfer of control to the customers by rendering of contractual services and on completion of all the performance obligations under the contract with a reasonable certainty of the ultimate realisation of the dues. Revenue is recognised in an amount that reflects the consideration which the Group expects to receive in exchange for the services rendered. The Group recognises revenue in the period in which it satisfies its performance obligation by transferring promised goods or services to the customer. The major sources of revenue and Group's accounting policy are as follows:

- (i) Transaction charges – revenue in respect of trading transactions on exchanges is recognised in accordance with the Group's fee scales at a point in time as when the transaction is completed.
- (ii) Listing fees - Revenue for listings fees is recognised when the listing event has taken place. Annual listing fees and processing fees in relation to listing is recognised on a straight-line basis over the period to which they relate.
- (iii) Book building fees – revenue is recognised at a point in time on completion of the book building process.
- (iv) Data Centre – Rack charges - revenue is recognised over the period of the contract with the customer. The revenue is calculated based on the specified charges for data centre racks and is recognised in the period in which the performance obligation is satisfied.
- (v) Data connectivity charges - revenue is recognised over the period of the contract with the customer. Connectivity charges are the fees paid by the trading members of the Group to establish and maintain a physical or virtual link to the exchange's trading system.

**NATIONAL STOCK EXCHANGE OF INDIA LIMITED**  
**Annexure V - Notes to the Restated Consolidated Financial Information**  
**(₹ in million, unless otherwise stated)**

- (vi) Clearing & Settlement Services - revenue in respect of clearing and settlement of transactions executed on exchanges is recognised in accordance with the fee scales at a point in time as and when the transaction is completed.
- (vii) Revenue from Technology services comprises Application Development and Maintenance services, E-learning Solutions, Online examination services, Infrastructure Management Services, IT security services and IT cloud services. Revenue from time and material and job contracts is recognised using the output method measured by units delivered, efforts expended, number of transactions processed, etc. Revenue related to fixed price maintenance and support services contracts, where the Group is standing ready to provide services is recognised based on time elapsed on a straight-line basis over the period of performance. In respect of other fixed-price contracts, revenue is recognised over a period of time using percentage-of-completion method of accounting with contract costs incurred determining the degree of completion of the performance obligation. The contract costs used in computing the revenues include cost of fulfilling warranty obligations. Revenue from online examination services is recognised on the basis of exams conducted and where there are multiple performance obligations, revenue is recognised using percentage-of-completion method of accounting with contract costs incurred determining the degree of completion of the performance obligation. Revenue from the sale of distinct third-party hardware is recognised at the point in time when control is transferred to the customer. The solutions offered by the Group may include supply of third-party equipment or software. In such cases, revenue for supply of such third-party equipment or software are recorded at gross or net basis depending on whether the Group is acting as the principal or as an agent. The Group recognises revenue at the gross amount of consideration when it is acting as a principal and at net amount of consideration when it is acting as an agent.
- (viii) Subscription and other fees related to data feed & terminal services and licensing services – revenue is recognised over a period of time to which the fee relates.
- (ix) Other services – all other revenue is recognised in the period in which the performance obligation is satisfied over a period of time or point in time.
- (x) Financing Component - The Group does not have any contracts where the period between the transfer of the promised services to the customer and payment by the customer exceeds one year. As a consequence, the Group does not adjust any of the transaction prices for the time value of money.

The Group considers the terms of the contract in determining the transaction price. The transaction price is based upon the amount the Group expects to be entitled to in exchange for transferring of promised services to the customer after deducting allowances and incentives such as discounts, volume rebates etc. Revenue excludes any taxes and duties collected on behalf of the government.

In respect of members who have been declared as defaulters by the Group, all amounts (dues) remaining to be recovered from such defaulters, net of available security and insurance cover available if any, till the date of being declared as defaulters are written off as bad debts. All subsequent recoveries are accounted when received.

In respect of Listed companies and other trade receivables where no such deposit is available with the exchange, as per the current practice, the amounts which are outstanding for more than 2 years are subject to 100% impairment. For amounts lying uncollected beyond a period of 3 years are written off. All subsequent recoveries are accounted when received.

**(d) Business Combinations**

The acquisition method of accounting is used to account for all business combinations, regardless of whether equity instruments or other assets are acquired. The consideration transferred for the acquisition of a subsidiary comprises:

- the fair values of the assets transferred;
- liabilities incurred to the former owners of the acquired business;
- equity interests issued by the Group; and
- fair value of any asset or liability resulting from a contingent consideration arrangement.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are, with limited exceptions, measured initially at their fair values at the acquisition date. The Group recognises any non-controlling interest in the acquired entity on an acquisition- by-acquisition basis either at fair value or at the non-controlling interest's proportionate share of the acquired entity's net identifiable assets. Acquisition-related costs are expensed as incurred.

The excess of the purchase consideration, as given below, over the fair value of the net identifiable assets acquired as on the date of acquisition, is recorded as goodwill.

**NATIONAL STOCK EXCHANGE OF INDIA LIMITED**  
**Annexure V - Notes to the Restated Consolidated Financial Information**  
**(₹ in million, unless otherwise stated)**

- consideration transferred;
- amount of any non-controlling interest in the acquired entity, and
- acquisition-date fair value of any previous equity interest in the acquired entity

If the purchase consideration is less than the fair value of the net identifiable assets of the business acquired, the difference is recognised in other comprehensive income and accumulated in equity as capital reserve provided there is clear evidence of the underlying reasons for classifying the business combination as a bargain purchase. In other cases, the bargain purchase gain is recognised directly in equity as capital reserve.

Where settlement of any part of cash consideration is deferred, the amounts payable in the future are discounted to their present value as at the date of exchange. The discount rate used is the entity's incremental borrowing rate, being the rate at which a similar borrowing could be obtained from an independent financier under comparable terms and conditions.

Contingent consideration is classified either as equity or a financial liability. Amounts classified as a financial liability are subsequently remeasured to fair value with changes in fair value recognised in the Restated Consolidated Statement of Profit and Loss.

If the business consideration is achieved in stages, the acquisition date carrying value of the acquirers previously held equity interest in the acquiree is remeasured to fair value at the acquisition date. Any gains or losses arising from such remeasurement are recognised in the Restated Consolidated Statement of Profit and Loss or the Restated Consolidated Statement of Changes in Equity, as appropriate.

**(e) Leases**

The Group's lease asset classes primarily consist of leases for land, buildings and equipment. The Group assesses whether a contract contains a lease, at inception of the contract. Ind AS 116 defines a lease as a contract, or a part of a contract, which conveys the right of use an asset (the underlying asset) for a period of time in exchange of consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group assesses whether: (i) the contract involves the use of an identified asset (ii) the Group has substantially all of the economic benefits from use of the asset through the period of the lease and (iii) the Group has the right to direct the use of the asset.

At the date of commencement of the lease, the Group recognises a right-of-use asset and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short term leases) and low value leases. For these short-term and low value leases, the Group recognises the lease payments as an operating expense on a straight-line basis over the term of the lease.

The lease payments are discounted using the interest rate implicit in the lease. If the rate cannot be readily determined, which is generally the case for leases in the Group, the lessee's incremental borrowing rate is used, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions.

To determine the incremental borrowing rate, the Group:

- where possible, uses recent third-party financing received by the individual lessee as a starting point, adjusted to reflect changes in financing conditions since third-party financing was received.
- uses a build-up approach that starts with a risk-free interest rate adjusted for credit risk for leases held by the Group, which does not have recent third-party financing.
- make adjustments specific to the lease.

If a readily observable amortising loan rate is available to the individual lessee (through recent financing or market data) which has a similar payment profile to the lease, the Group use that rate as a starting point to determine the incremental borrowing rate.

The lease liability is initially measured at amortised cost at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates.

Right-of-use assets are generally depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis. If the Group is reasonably certain to exercise a purchase option, the right-of-use asset is depreciated over the underlying asset's useful life. Refer note 1(ii)(f) for the other accounting policies relevant to leases.

**NATIONAL STOCK EXCHANGE OF INDIA LIMITED**  
**Annexure V - Notes to the Restated Consolidated Financial Information**  
**(₹ in million, unless otherwise stated)**

**(f) Trade receivables**

Trade receivables are amounts due from customers for services performed in the ordinary course of business and reflects Group's unconditional right to consideration (that is, payment is due only on the passage of time). Trade receivables are recognised initially at the transaction price as they do not contain significant financing components. The Group holds the trade receivables with the objective of collecting the contractual cash flows and therefore measures them subsequently at amortised cost using the effective interest method, less loss allowance for credit impairment.

**(g) Financial assets**

- **Classification of financial assets at amortised cost:** The Group classifies its financial assets at amortised cost only if both of the following criteria are met:

- Asset is held with a business model whose objective is to collect the contractual cash flows
- The contractual terms give rise to cash flows that are solely payments of principal and interest

Financial assets classified at amortised cost comprise of trade receivables, bonds, debentures and government securities.

- **Classification of financial assets at fair value through other comprehensive income (FVOCI):** Financial assets at FVOCI comprise:

- Equity securities (listed or unlisted) which are not held for trading and for which the Group has irrevocably elected at initial recognition to recognise changes in fair value through OCI rather than restated consolidated statement of profit and loss. These are strategic investments and the Group considers this classification to be more relevant.
- Debt securities where the contractual cash flows are solely principal, and interest and the objective of the Group's business model is achieved both by collecting contractual cash flows and selling financial assets.

- **Classification of financial assets at fair value through profit or loss (FVTPL):** The Group classifies the following financial assets at FVTPL:

- Debt investments (Mutual funds) that do not qualify for measurement at either amortised cost or FVOCI.
- Equity instruments for which the entity has not elected to recognise fair value gains and losses through OCI.

Refer note 1(ii)(i) for the other accounting policies relevant to investments and other financial assets.

**(h) Property, plant and equipment (including Capital Work in Progress)**

Freehold land is carried at the historical cost of acquisition. All other items of property, plant and equipment are stated at historical cost less depreciation. Cost comprises of purchase price and any initial directly attributable cost of bringing the asset to its working condition for its intended use.

*Depreciation methods, estimated useful lives and residual value*

Depreciation is calculated using the straight-line method to allocate their cost, net of their residual values, over their estimated useful lives as prescribed in Schedule II of the Companies Act, 2013 except in respect of certain categories of assets, where the useful life of the assets has been assessed based on the management's technical evaluation. The estimated useful lives are as mentioned below:

| Block of Asset        | Useful life   |
|-----------------------|---------------|
| Building              | 60 years      |
| Furniture and fixture | 5 to 10 years |
| Office equipment      | 4 to 5 years  |

**NATIONAL STOCK EXCHANGE OF INDIA LIMITED**  
**Annexure V - Notes to the Restated Consolidated Financial Information**  
**(₹ in million, unless otherwise stated)**

|                                                 |              |
|-------------------------------------------------|--------------|
| Electrical equipment & installations            | 10 years     |
| Computer systems - office automation and others | 3 to 4 years |
| Telecommunication systems                       | 4 years      |
| Trading systems                                 | 4 years      |
| Clearing & Settlement Systems                   | 4 years      |
| Motor Vehicle                                   | 4 years      |

The useful lives for computer systems office automation, computer systems – others, telecommunication systems, trading systems and clearing & settlement systems have been determined based on technical evaluation done by the management's expert which are lower than those specified by Schedule II to the Companies Act, 2013, in order to reflect the actual usage of the assets. The Group believes that the technically evaluated useful lives, different from Schedule II of the Companies Act, 2013, best represent the period over which these assets are expected to be used. The residual values are not more than 5% of the original cost of the asset. The assets' residual values and useful lives are reviewed at the end of each reporting period and adjusted on a prospective basis if appropriate.

Refer note 1(ii)(m) for the other accounting policies relevant to Property, plant and equipment (including Capital Work in Progress).

**(i) Investment properties**

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the Group, is accounted as investment property. Investment property is measured initially at its cost, including related transaction costs.

Investment properties are depreciated using the straight-line method over their estimated useful lives. Investment properties generally have an estimated useful life of 60 years. The useful life has been determined based on technical evaluation performed by the management expert.

**(j) Intangible assets**

Intangible assets purchased are measured at cost as at the date of acquisition, as applicable, less accumulated amortisation and accumulated impairment, if any.

*(i) Goodwill:*

Goodwill represents the excess of purchase consideration over the fair value of the net identifiable assets acquired as on the date of acquisition. Goodwill on acquisitions of business and subsidiaries is included in intangible assets. Goodwill is not amortised, but it is tested for impairment annually, or more frequently if events or changes in circumstances indicate that it might be impaired and is carried at cost less accumulated impairment losses. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose. The units or groups of units are identified at the lowest level at which goodwill is monitored for internal management purposes, which in our case are the operating segments.

*(ii) Other intangible assets:*

Costs associated with maintaining software programmes are recognised as an expense as incurred. Development costs of internally generated intangible assets that are directly attributable to the design and testing of identifiable and unique software products controlled by the Group are recognised as intangible assets when the following criteria are met:

- it is technically feasible to complete the software so that it will be available for use
- management intends to complete the software and use or sell it
- there is an ability to use or sell the software
- it can be demonstrated how the software will generate probable future economic benefits
- adequate technical, financial and other resources to complete the development and to use or sell the software are available, and

**NATIONAL STOCK EXCHANGE OF INDIA LIMITED**  
**Annexure V - Notes to the Restated Consolidated Financial Information**  
**(₹ in million, unless otherwise stated)**

- the expenditure attributable to the software during its development can be reliably measured.

Directly attributable costs that are capitalised as part of the software include employee costs and an appropriate portion of relevant overheads.

Research expenditure and development expenditure that do not meet the criteria in (ii) above are recognised as an expense as incurred. Development costs previously recognised as an expense are not recognised as an asset in a subsequent period.

Capitalised development costs are recorded as intangible assets and amortised from the point at which the asset is available for use.

Computer software is amortised over a period of 4 years.

**(k) Core Settlement Guarantee Fund**

The Group contributes to Settlement Guarantee Fund/ Core Settlement Guarantee Fund in accordance with Securities Exchange Board of India ('SEBI') (Stock Exchanges and Clearing Corporations) Regulation 2018. The Parent company contributes amounts pertaining to Minimum Required Corpus to the Core Settlement Guarantee Fund, which is determined as per SEBI guidelines. The contribution to Settlement Guarantee Fund/ Core Settlement Guarantee Fund by the Parent Company is recorded as an expense in the Restated Consolidated Statement of Profit and Loss and contribution by its clearing corporation subsidiary is recorded as an appropriation from Group's retained earnings and such amounts are separately disclosed as Core Settlement Guarantee Fund in the Restated Consolidated Statement of Assets and Liabilities.

Trades executed on the exchange platform are cleared and settled by the clearing corporations under interoperability framework prescribed by SEBI. Post interoperability, the exchange is required to proportionately contribute to Core SGF of the clearing corporations, namely NSE Clearing Limited (NCL), Indian Clearing Corporation Limited (ICCL) and Metropolitan Clearing Corporation of India Limited (MCCIL) which clears and settles the trades of the exchange. Such contributions are also recorded as an expense and separately disclosed in the Restated Consolidated Statement of Assets and Liabilities. As per SEBI guidelines, the Group invests balances in Core Settlement Guarantee Fund in prescribed category of securities which are earmarked/restricted and income earned on such investments are attributed directly and credited to the fund balance. Fines and penalties recovered by the Group from members are also directly attributed and credited to the fund balance.

The Group records a loss in its Restated Consolidated Statement of Profit and Loss in case of a default event, as per the default waterfall defined under the SEBI regulations, including by utilization of the Core Settlement Guarantee Fund balance. (Refer note 36).

**1. (ii) Other accounting policies**

This note provides a list of other accounting policies adopted in the preparation of these Restated Consolidated Financial Information to the extent they have not already been disclosed in the other notes above. These policies have been consistently applied to all the period(s)/year(s) presented from the latest financial statements presented for the three months period ended June 30, 2026, unless otherwise stated.

**(a) Rounding of amounts**

All amounts disclosed in the Restated Consolidated Financial Information and notes have been rounded off to the nearest million as per the requirement of Schedule III, unless otherwise stated. Figures representing 0.00 denotes the amount below the rounding off convention.

**(b) Principles of consolidation and equity accounting**

*(i) Subsidiaries*

Subsidiaries are all entities over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the relevant activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group until the date on which such control ceases.

**NATIONAL STOCK EXCHANGE OF INDIA LIMITED**  
**Annexure V - Notes to the Restated Consolidated Financial Information**  
**(₹ in million, unless otherwise stated)**

The acquisition method of accounting is used to account for business combinations by the Group.

The Group combines the financial statements of the parent and its subsidiaries line by line adding together like items of assets, liabilities, equity, income and expenses. Intercompany transactions, balances and unrealised gains on transactions between Group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

Non-controlling interests in the results and equity of subsidiaries are shown separately in the restated consolidated statement of profit and loss, restated consolidated statement of changes in equity and restated Consolidated Statement of Assets and Liabilities respectively.

*(ii) Associates*

Associates are all entities over which the Group has significant influence but not control or joint control. This is generally the case where the Group holds between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting (see (iv) below), after initially being recognised at cost in the Restated Consolidated Statement of Assets and Liabilities.

*(iii) Joint Arrangements*

Under Ind AS 111 Joint Arrangements, investments in joint arrangements are classified as either joint operations or joint ventures. The classification depends on the contractual rights and obligations of each investor, rather than the legal structure of the joint arrangement.

In the case of joint ventures, parties having joint control of the arrangements have rights to the net assets and obligations for the liabilities, relating to such arrangements.

Interests in joint ventures are accounted for using the equity method (see (iv) below), after initially being recognised at cost in the Restated Consolidated Statement of Assets and Liabilities.

*(iv) Equity method*

Under the equity method of accounting, the investments are initially recognised at cost and adjusted thereafter to recognise the Group's share of the post - acquisition profits or losses of the investee in restated consolidated statement of profit and loss, and the group's share of other comprehensive income of the investee in other comprehensive income. Dividends received or receivable from associates and joint ventures are recognised as a reduction in the carrying amount of the investment.

When the Group's share of losses in an equity accounted investment equals or exceeds its interest in the entity, including any other unsecured long-term receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the other entity.

Unrealised gains on transactions between the Group and its associates and joint ventures are eliminated to the extent of the group's interest in these entities. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of equity accounted investees have been changed where necessary to ensure consistency with the policies adopted by the Group.

The carrying amount of equity accounted investments are tested for impairment in accordance with the policy described in note (g) below

***Changes in ownership interests***

The Group treats transactions with non-controlling interests that do not result in a loss of control as transactions with equity owners of the Group. A change in ownership interest results in an adjustment between the carrying amounts of the controlling and non-controlling interests to reflect their relative interests in the subsidiary. Any difference between the amount of the adjustment to non-controlling interests and any consideration paid or received is recognised within equity.

When the Group ceases to consolidate or equity account for an investment because of a loss of control, joint control or significant influence, any retained interest in the entity is remeasured to its fair value with the change in carrying

**NATIONAL STOCK EXCHANGE OF INDIA LIMITED**  
**Annexure V - Notes to the Restated Consolidated Financial Information**  
**(₹ in million, unless otherwise stated)**

amount recognised in restated consolidated statement of profit and loss. This fair value becomes the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to restated consolidated statement of profit and loss.

If the ownership interest in a joint venture or an associate is reduced but joint control or significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income are reclassified to restated consolidated statement of profit and loss, where appropriate.

**(c) Segment reporting**

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker.

**(d) Foreign currency translation and transactions**

*(i) Transactions and balances*

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at the period end exchange rates are recognised in restated consolidated statement of profit and loss.

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss. For example, translation differences on non-monetary assets and liabilities such as equity instruments held at fair value through profit or loss are recognised in restated consolidated statement of profit and loss as part of the fair value gain or loss and translation differences on non-monetary assets such as equity investments classified as FVOCI are recognised in other comprehensive income.

*(ii) Group Companies*

The results and financial position of foreign operations that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- assets and liabilities are translated at the closing rate at the reporting date;
- income and expenses are translated at average exchange rates (unless this is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions); and
- all resulting exchange differences are recognised in other comprehensive income.

On consolidation, exchange differences arising from the translation of any net investment in foreign entities are recognised in other comprehensive income. When a foreign operation is sold, the associated exchange differences are reclassified to restated consolidated statement of profit and loss, as part of the gain or loss on sale.

**(e) Income taxes**

Income tax expense comprises current tax expense and the net change in the deferred tax asset or liability during the period/year.

Current and deferred tax is recognised in restated consolidated statement of profit and loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses, if any.

**NATIONAL STOCK EXCHANGE OF INDIA LIMITED**  
**Annexure V - Notes to the Restated Consolidated Financial Information**  
**(₹ in million, unless otherwise stated)**

*Current income taxes:*

The current income tax charge is calculated based on the tax laws enacted or substantively enacted at the end of the reporting period. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate based on amounts expected to be paid to the tax authorities.

Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

The Group applies significant judgement in identifying uncertainties over income tax treatments. Uncertain tax positions are reflected in the overall measurement of the Group's tax expense and are based on the most likely amount or expected value that is to be disallowed by the taxing authorities whichever better predict the resolution of uncertainty. Uncertain tax balances are monitored and updated as and when new information becomes available, typically upon examination or action by the taxing authorities or through statute expiration.

The Group considers when a particular amount payable for interest and penalties on income taxes is determined to be within the scope of Ind AS 37, it is presented as part of financing cost or other expenses, respectively unless when there is an overall settlement with tax authority and the interest and penalties cannot be identified separately in which case it is determined to be part of income taxes and accounted under Ind AS 12.

*Deferred income taxes:*

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the Restated Consolidated Financial Information. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting profit nor taxable profit (tax loss). Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

The carrying amount of deferred tax assets are reviewed at the end of each reporting period and are recognised only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax liabilities are not recognised for temporary differences between the carrying amount and tax bases of investments in subsidiaries, associates and interest in joint arrangements where the Group is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

Deferred tax assets are not recognised for temporary differences between the carrying amount and tax bases of investments in subsidiaries, associates and interest in joint arrangements where it is not probable that the differences will reverse in the foreseeable future and taxable profit will not be available against which the temporary difference can be utilised.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority.

**(f) Leases**

A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

*As a lessee*

Leases are recognised as a right-of-use asset and a corresponding liability at the lease commencement date i.e. the date at which the lease asset is first available for use by the Group. Contracts may contain both lease and non-lease components. The Group allocates the consideration in the contract to the lease and non-lease components based on their relative stand-alone prices.

Assets and liabilities arising from a lease are initially measured on present value basis. Lease liabilities include the net present value of the following lease payments

**NATIONAL STOCK EXCHANGE OF INDIA LIMITED**  
**Annexure V - Notes to the Restated Consolidated Financial Information**  
**(₹ in million, unless otherwise stated)**

- fixed payments (including in-substance fixed payments), less any lease incentives receivable.
- variable lease payments that are based on an index or a rate, initially measured using the index or rate as at the commencement date.
- amounts expected to be payable by the Group under residual value guarantees.
- the exercise price of a purchase option if the Group is reasonably certain to exercise that option, and
- payments of penalties for terminating the lease, if the lease term reflects the Group exercising the option.

Lease payments are allocated between principal and finance cost. The finance cost is charged to restated consolidated statement of profit and loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability.

The right-of-use assets are initially recognised at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses.

*As a lessor*

Lease for which the Group is a lessor is classified as finance or operating lease. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases. For operating leases, rental income is recognised on straight line basis over the term of the relevant lease.

Entity's specific details about the Group's leasing policy are provided in note 1(i)(e).

**(g) Impairment of assets**

Goodwill and intangible assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. Other assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units).

Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

**(h) Cash and cash equivalents**

Cash and Cash equivalents includes cash on hand, deposits held at call with financial institutions, government securities and other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. These do not include bank balances earmarked/restricted for specific purposes.

**(i) Investments & other financial assets**

• *Classification*

The Group classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through restated consolidated statement of profit and loss), and
- those measured at amortised cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in restated consolidated statement of profit and loss or other comprehensive income. For investments in debt instruments, this will depend on the

**NATIONAL STOCK EXCHANGE OF INDIA LIMITED**  
**Annexure V - Notes to the Restated Consolidated Financial Information**  
**(₹ in million, unless otherwise stated)**

business model in which the investment is held. For investments in equity instruments, this will depend on whether the Group has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income. The Group reclassifies debt investments when and only when its business model for managing those assets changes.

- *Recognition*

Regular way purchases and sales of financial assets are recognised on trade-date, being the date on which the Group commits to purchase or sale the financial asset.

- *Measurement*

At initial recognition, the Group measures a financial asset (excluding trade receivables which do not contain a significant financing component) at its fair value and in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in restated consolidated statement of profit and loss.

- ❖ *Debt instruments*

Subsequent measurement of debt instruments depends on the Group's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Group classifies its debt instruments:

- **Amortised cost:** Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. A gain or loss on a debt investment that is subsequently measured at amortised cost and is not part of a hedging relationship is recognised in restated consolidated statement of profit and loss when the asset is derecognised or impaired. Interest income from these financial assets is included in finance income using the effective interest rate method.
- **Fair value through other comprehensive income (FVOCI):** Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at fair value through other comprehensive income (FVOCI). Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognised in restated consolidated statement of profit and loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to restated consolidated statement of profit and loss and recognised under other income. Interest income from these financial assets is included in other income using the effective interest rate method.
- **Fair value through profit or loss (FVTPL):** Assets that do not meet the criteria for amortised cost or FVOCI are measured at fair value through profit or loss. A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss is recognised in restated consolidated statement of profit and loss and presented net in the restated consolidated statement of profit and loss under other income in the period in which it arises. Interest or dividend income, if any from these financial assets is separately included in other income.

- ❖ *Equity investments (other than investments in associates and joint venture)*

The Group subsequently measures all equity investments at fair value. Where the Group's management has elected to present fair value gains and losses on equity investments in other comprehensive income, there is no subsequent reclassification of fair value gains and losses to restated consolidated statement of profit and loss. Dividends from such investments continue to be recognised in restated consolidated statement of profit and loss as other income when the Group's right to receive payments is established. Impairment losses (and reversal of impairment losses) on equity investments measured at FVOCI are not reported separately from other changes in fair value.

Changes in the fair value of financial assets at fair value through profit or loss are recognised in other income in the restated consolidated statement of profit and loss.

Purchase and sale of investments are accounted at trade date.

**NATIONAL STOCK EXCHANGE OF INDIA LIMITED**  
**Annexure V - Notes to the Restated Consolidated Financial Information**  
**(₹ in million, unless otherwise stated)**

- *Impairment of financial assets*

The Group assesses on a forward-looking basis the expected credit losses associated with its assets carried at amortised cost and FVOCI debt instruments. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

For trade receivables only, the Group applies the simplified approach permitted by Ind AS 109 Financial Instruments, which requires expected lifetime losses to be recognised from initial recognition of the receivables.

*De-recognition of financial assets*

A financial asset is de-recognised only when

- The Group has transferred the rights to receive cash flows from the financial asset or
- retains the contractual rights to receive the cash flows of the financial asset but assumes a contractual obligation to pay the cash flows to one or more recipients.

Where the Group has transferred an asset, it evaluates whether it has transferred substantially all risks and rewards of ownership of the financial asset. In such cases, the financial asset is de-recognised. Where the Group has not transferred substantially all risks and rewards of ownership of the financial asset, the financial asset is not de-recognised.

Where the Group has neither transferred a financial asset nor retains substantially all risks and rewards of ownership of the financial asset, the financial asset is de-recognised if the Group has not retained control of the financial asset. Where the Group retains control of the financial asset, the asset is continued to be recognised to the extent of continuing involvement in the financial asset.

Purchase and sale of investment are accounted at trade date.

- *Income recognition*

Interest income

Interest income from financial assets at fair value through profit or loss is disclosed as interest income within other income. Interest income on financial assets at amortised cost and financial assets at FVOCI is calculated using the effective interest method and is recognised in the restated consolidated statement of profit and loss as part of other income.

Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for financial assets that subsequently become credit-impaired. For credit-impaired financial assets the effective interest rate is applied to the net carrying amount of the financial asset (after deduction of the loss allowance).

Dividends

Dividends are recognised in restated consolidated statement of profit and loss only when the right to receive payment is established, it is probable that the economic benefits associated with the dividend will flow to the Group, and the amount of the dividend can be reliably measured. This applies even if they are paid out of pre-acquisition profits, unless the dividend clearly represents a recovery of part of the cost of the investment.

Entity's specific details about the Group's investments and other financial assets are provided in note 1(i)(g).

**(j) Financial liabilities**

- *Classification as debt or equity*

Financial liabilities and equity instruments issued by the Group are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument.

- *Initial recognition and measurement*

Financial liabilities are recognised when the Group becomes a party to the contractual provisions of the instrument. Financial liabilities are initially measured at the amortised cost unless at initial recognition, they are classified as fair value through profit and loss.

**NATIONAL STOCK EXCHANGE OF INDIA LIMITED**  
**Annexure V - Notes to the Restated Consolidated Financial Information**  
**(₹ in million, unless otherwise stated)**

- *Subsequent measurement*

Financial liabilities are subsequently measured at amortised cost using the effective interest rate method. Financial liabilities at FVTPL are stated at fair value with any gains or losses arising on re-measurement recognised in the restated consolidated statement of profit and loss, except for the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability which is recognised in other comprehensive income.

- *Derecognition*

A financial liability is derecognised when the obligation specified in the contract is discharged, cancelled or expires.

**(k) Derivatives**

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently re-measured to their fair value at the end of each reporting period.

**(l) Offsetting financial instruments**

Financial assets and liabilities are offset and the net amount is reported in the Restated Consolidated Statement of Assets and Liabilities where there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Group or the counterparty.

**(m) Property, Plant and Equipment (including capital Work in Progress)**

The Group's accounting policy for land is explained in note 1(i)(h) above. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to restated consolidated statement of profit and loss during the reporting period in which they are incurred.

In case of subsidiary company NSEIT Limited, fixed assets are depreciated as per the useful life specified under schedule II to Companies Act 2013 except the furniture and fixtures, electrical installation and office equipment including civil improvements at leased premises which are depreciated over the lease period.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with carrying amount and are included in restated consolidated statement of profit and loss.

Depreciation on assets purchased / disposed off during the period/year is provided on pro rata basis with reference to the date of additions / deductions.

Fixed assets whose aggregate cost is ₹5,000 or less are depreciated fully in the period/year of acquisition.

**(n) Investment properties**

Investment property is measured initially at its cost, including related transaction costs. Subsequent expenditure is capitalized to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Group and the cost of the item can be measured reliably. All other repair and maintenance costs are expensed when incurred. When part of an investment property is replaced, the carrying amount of the replaced part is derecognised.

**(o) Trade and other payables**

These amounts represent liabilities for goods and services provided to the Group prior to the end of financial period which are unpaid. They are recognised initially at their fair value and subsequently measured at amortised cost using the effective interest method.

**(p) Provisions**

Provisions for legal claims are recognised when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Provisions are not recognised for future operating losses. Where there are number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognized even if the likelihood of an outflow with respect to only one item included in the same class of obligations may be small.

At the end of each reporting period, provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at a future date. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as interest expense.

**(q) Contingent Liabilities**

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent liabilities are not disclosed in case the possibility of an outflow of resources embodying economic benefits is remote.

**(r) Employee benefits**

*(i) Short-term obligations*

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are the amounts expected to be paid when the liabilities are settled. Short term employee benefits are recognised in restated consolidated statement of profit and loss in the period in which the related service is rendered. The liabilities are presented as current employee benefit obligations in the Restated Consolidated Statement of Assets and Liabilities.

*(ii) Compensated Absences*

The liabilities for compensated absences are not expected to be settled wholly within 12 months after the end of the period in which the employees render the related service. They are therefore measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting period using the projected unit credit method. The benefits are discounted using the market yields at the end of the reporting period that have terms approximating to the terms of the related obligation. Remeasurements as a result of experience adjustments and changes in actuarial assumptions are recognised in restated consolidated statement of profit and loss.

The obligations are presented as current liabilities in the Restated Consolidated Statement of Assets and Liabilities since the Group does not have an unconditional right to defer settlement for at least twelve months after the reporting period, regardless of when the actual settlement is expected to occur.

*(iii) Post-employment obligations*

The Group operates the following post-employment schemes:

- defined benefit plans such as gratuity
- defined contribution plans such as superannuation and provident fund.

*Defined benefit plans*

The Group has maintained a Group Gratuity cum Life Assurance Scheme with the Life Insurance Corporation of India (LIC) towards which it annually contributes a sum determined by LIC. The liability or asset recognised in the Restated Consolidated Statement of Assets and Liabilities in respect of defined benefit gratuity plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to yields on government securities at the end of the reporting period that have terms approximating to the terms of the related obligation.

**NATIONAL STOCK EXCHANGE OF INDIA LIMITED**  
**Annexure V - Notes to the Restated Consolidated Financial Information**  
**(₹ in million, unless otherwise stated)**

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the restated consolidated statement of profit and loss.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the statement of changes in equity and in the Restated Consolidated Statement of Assets and Liabilities.

Changes in the present value of the defined benefit obligation resulting from plan amendments or curtailments are recognised immediately in restated consolidated statement of profit and loss as past service cost.

*Defined contribution plans*

The Group pays provident fund contributions to publicly administered Provident Funds as per local regulations. The Group has no further payment obligations once the contributions have been paid. The contributions are accounted for as defined contribution plans and the contributions are recognised as employee benefit expense when they are due.

*Superannuation*

Superannuation benefits for employees designated as chief managers and above are covered by Group policies with the Life Insurance Corporation of India. Group's contribution payable for the period/year is charged to restated consolidated statement of profit and loss. There are no other obligations other than the annual contribution payable.

*National Pension Scheme (NPS)*

In respect of employees who opt for contribution to the NPS, Group contribute a certain percentage of the total basic salary of such employees to the aforesaid scheme, a defined contribution plan, which is managed and administered by pension fund management companies. Such contributions are recognised in the restated consolidated statement of profit and loss Account in the period/year in which they accrue.

*Bonus plans*

The Group recognises a liability and an expense for bonuses. The Group recognises a provision where contractually obliged or where there is a past practice that has created a constructive obligation.

In case of the Parent Company and one of the subsidiary company, SEBI has laid down certain norms in terms of the compensation policy for the key management personnel which are as under:

- The variable pay component will not exceed one third of the total pay.
- 50% of the variable pay will be paid on a deferred basis after three years.

**(s) Contributed Equity shares are classified as equity**

Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

**(t) Dividends**

Provision is made for the amount of any dividend declared, being appropriately authorised and no longer at the discretion of the entity, on or before the end of the reporting period but not distributed at the end of the reporting period.

**(u) Earnings per share**

Basic earnings per share

Basic earnings per share is calculated by dividing:

- the profit attributable to owners of the Group
- by the weighted average number of equity shares outstanding during the period/financial year, adjusted for bonus elements in equity shares issued during the period/year.

**NATIONAL STOCK EXCHANGE OF INDIA LIMITED**  
**Annexure V - Notes to the Restated Consolidated Financial Information**  
**(₹ in million, unless otherwise stated)**

*Diluted earnings per share*

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account:

- the after income tax effect of interest and other financing costs associated with dilutive potential equity shares, and
- the weighted average number of additional equity shares that would have been outstanding assuming the conversion of all dilutive potential equity shares.

**(v) Non- Current assets held for Sale**

Non-current assets (or disposal Groups) are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use and a sale is considered highly probable. They are measured at the lower of their carrying amount and fair value less costs to sell, except for assets such as deferred tax assets, assets arising from employee benefits, financial assets and contractual rights under insurance contracts, which are specifically exempt from this requirement.

An impairment loss is recognised for any initial or subsequent write-down of the asset (or disposal Group) to fair value less costs to sell. A gain is recognised for any subsequent increases in fair value less costs to sell of an asset (or disposal Group), but not in excess of any cumulative impairment loss previously recognised. A gain or loss not previously recognised by the date of the sale of the non-current asset (or disposal Group) is recognised at the date of de-recognition. Non-current assets (including those that are part of a disposal Group) are not depreciated or amortised while they are classified as held for sale. Interest and other expenses attributable to the liabilities of a disposal Group classified as held for sale continue to be recognised.

Non-current assets classified as held for sale and the assets of a disposal group classified as held for sale are presented separately from the other assets in the Restated Consolidated Statement of Assets and Liabilities. The liabilities of a disposal group classified as held for sale are presented separately from other liabilities in the Restated Consolidated Statement of Assets and Liabilities.

A discontinued operation is a component of the entity that has been disposed of or is classified as held for sale and that represents a separate major line of business or geographical area of operations, is part of a single co-ordinated plan to dispose of such a line of business or area of operations, or is a subsidiary acquired exclusively with a view to resale. The results of discontinued operations are presented separately in the restated consolidated statement of profit and loss.

**(w) Recently issued accounting pronouncements**

Ministry of Corporate Affairs (“MCA”) notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time.

During the three months period ended June 30, 2026, MCA has not notified any new standards or amendments to the existing standards applicable to the Group.

The goodwill is tested for impairment at least annually or more frequently if events or changes in circumstances indicate that it might be impaired. For impairment testing, goodwill arising on acquisition of business, is allocated to a cash generating unit "CGU" representing the lowest level of group of assets that generates independent cash flows within the Group at which goodwill is monitored for internal management reporting purposes.

The recoverable amount of the CGU is determined as higher of fair value less cost to sell and value in use. The Group determine the value in use of the CGU using the income approach, based on future cash flows, after considering current economic conditions and trends, estimated future operating results, growth rates and anticipated future economic conditions. The Group assesses the valuation methodology based upon the relevance and availability of the data at the time the valuation is performed.

The Group had evaluated goodwill for impairment as at the end of the reporting period i.e., March 31, 2026, March 31, 2025 and March 31, 2024 based on the future cash flows and other factors of the related CGUs. Basis the said evaluation performed by the Group, the carrying amount does not exceed the recoverable amount of the cash generating units. Accordingly, there was no impairment recorded for the year ended March 31, 2026, March 31, 2025 and March 31, 2024. Subsequent to year ended March 31, 2026 and March 31, 2025, there were no identifiable events or indications for impairment. Accordingly, there was no impairment recognised for the three months periods ended June 30, 2026 and June 30, 2025.

Further, the Management believes that any reasonably possible change in the key assumptions would not cause the carrying amount to exceed the recoverable amount of the cash generating units.

\*The Group is subject to tax assessments and ongoing proceedings, which are pending before various Tax Appellate Authorities. Management periodically evaluates the positions taken in tax returns with respect to such matters, including unresolved tax disputes, which involves interpretation of applicable tax regulations and judicial precedents. Income tax liability and Income tax asset balances are presented, after recognising as appropriate, provision for taxes payable and contingencies basis management's assessment of outcome of such ongoing proceedings and amounts that may become payable to the tax authorities. Considering the nature of such estimates and uncertainties involved, the amount of such provisions may change upon final resolution of the matters with tax authorities (Refer note 34 (ii)(a)) for contingent liabilities on account of disputed demands from income tax authorities.

ii) **Defined Benefit Plans :**

(a) **Gratuity :**

The Group was providing for gratuity for employees as per Payment of Gratuity Act, 1972. With effect from November 21, 2025, Gratuity is being provided for employees as per Code on Social Security, 2020. Employees who are in continuous service for a period of 5 years are eligible for gratuity. The amount of gratuity is payable on retirement/termination of the employee's last drawn monthly wages as per New Labour Codes multiplied for the number of years of service.

NSE has funded gratuity plan and makes contribution to recognised funds with Life Insurance Corporation of India (LIC). For other subsidiaries, gratuity is not funded and provisions are made for the defined benefit with respect to gratuity liability based on the present value of defined benefit obligation as per the actuarial valuation calculation.

On November 21, 2025, the Government of India notified the Code on Wages, 2019, the Industrial Relations Code, 2020, the Code on Social Security, 2020, and the Occupational Safety, Health and Working Conditions Code, 2020, collectively referred to as the 'New Labour Codes', consolidating 29 existing labour laws. The Group had assessed the existing employee benefit obligation during the year ended March 31, 2026. Considering the impact arising out of an enactment of the new legislation is an event of non-recurring nature, the Group has presented incremental provision of ₹1,264.41 million as "Impact of New Labour Codes" under "Exceptional Items" in the Restated Consolidated Financial Information for the year ended March 31, 2026.

During the three months period ended June 30, 2026, the Group has revised its Staff emoluments to align with the requirements under New Labour Codes. Accordingly, reversal of excess provision for past service cost towards gratuity of ₹483.21 million is presented under "Exceptional Items" in the Restated Consolidated Financial Information for the three months period ended June 30, 2026.

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period/year) has been applied as when calculating the defined benefit liability recognised in the Restated Consolidated Statement of Assets and Liabilities.

**(b) Compensated Absences :**

The leave obligations cover the Group's liability for earned leave which are considered as other long-term benefits. The entire amount of the provision of ₹1,007.12 million (June 30, 2025: ₹770.35 million; March 31, 2026: ₹771.38 million; March 31, 2025: ₹658.53 million and March 31, 2024: ₹178.60 million) is presented as current, since the Group does not have an unconditional right to defer settlement for any of these obligations. However, based on past experience, NSE does not expect all employees to avail the full amount of accrued leave or require payment for such leave within the next 12 months.

(c) On February 28, 2019, the Honorable Supreme Court of India delivered a judgement in the case of "Vivekananda Vidyamandir and Others Vs The Regional Provident Fund Commissioner (II) West Bengal" in relation to non-exclusion of certain allowances from the definition of "basic wages" of the relevant employees for the purposes of determining contribution to provident fund under the Employees' Provident Funds & Miscellaneous Provisions Act, 1952. The Employees' Provident Fund Organisation also issued a circular (Circular No. C-1/1(33)2019/Vivekananda Vidyamandir/284) dated March 20, 2019 in relation to aforesaid matter. NSE has given effect to this judgment with effect from April 1, 2019. In NSE's assessment, this did not have a significant impact on its Restated Consolidated Financial Information.

**31 Segment Information**

**(a) Description of segments and principal activities**

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision Maker ("CODM") of the Group. The CODM, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Managing Director and CEO of the Parent Company. The Group has identified the following segments i.e. Trading Services, Clearing Services and Others as reportable segments based on the information reviewed by CODM.

1: **Trading Services** : This part of the business offers services related to trading in equity, equity derivatives, debt, currency derivatives and commodity derivatives segments. Revenue includes transaction charges, listing & book building fees, data centre-rack charges and data connectivity charges.

2: **Clearing Services** : This part of the business offers clearing and settlement of the trades executed in the cash market, future & options, currency derivatives and commodity derivatives segments.

3: **Others** include results of operations from data feed services, data terminal services, strategic investments and index licensing services.

The above business segments have been identified considering :

- the nature of products and services
- the differing risks
- the internal organisation and management structure and
- the internal financial reporting systems.

The segment information presented is in accordance with the accounting policies adopted for preparing the Consolidated Restated Financial Information of the Group. Segment revenues, expenses and results include inter-segment transfers. Such transfers are undertaken either at competitive market prices charged to unaffiliated customers for similar goods and services or at contracted rates. These transfers are eliminated on consolidation.

**(b) Segment Revenue :**

Transactions between segments are carried out at arms length. Revenue and expenses which relate to the enterprise as a whole and are not allocable to a segment on reasonable basis have been disclosed as unallocable. The CODM primarily uses a measure of profit before tax to assess the performance of the operating segments.

(iii) Extension and termination options

Extension and termination options are included in many of the leases. In determining the lease term, the management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. This assessment is reviewed if a significant event or a significant change in circumstances occurs which affects this assessment and that is within the control of the Group.

In determining the lease term, the management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated).

**40 FINANCIAL RISK MANAGEMENT**

The Group's business activities expose it to a variety of financial risks, namely liquidity risk, market risks and credit risk. The Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The Group's senior management has the overall responsibility for developing and implementing the Group's risk management policies. The Group has constituted a Risk Management Committee to oversee the implementation of the Group's risk management policies.

The Risk Management Committee of the Group is supported by the Treasury Committee that provides assurance that the Group's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Group's policies and risk objectives.

There is a dedicated Treasury department to ensure Treasury investments are made as per the approved Prudential norms of Investment.

**A MANAGEMENT OF LIQUIDITY RISK**

Liquidity risk is the risk that the Group will face difficulties in meeting its obligations associated with its financial liabilities. The Group's approach to managing liquidity is to ensure that it will have sufficient funds to meet its liabilities when due without incurring avoidable costs. In doing this, management considers both normal and stressed conditions. A material and sustained shortfall in Group's cash flow could impair investor confidence.

The Group maintained a cautious funding strategy, with a positive cash balance throughout the three months periods ended June 30, 2026 and June 30, 2025 and years ended March 31, 2026; March 31, 2025 and March 31, 2024. Cash flows from operating and investing activities provides the funds to service the financing of liabilities on a day-to-day basis.

The Group's treasury department regularly monitors the rolling forecasts to ensure it has sufficient cash on an on-going basis to meet operational needs. Any short term surplus cash generated by the operations, over and above the amount required for working capital management and other operational requirements, is retained as cash and cash equivalents (to the extent required) and any excess is invested in interest bearing deposits and other marketable debt investments not invested in equity linked funds including the government securities, mutual funds and exchange traded funds with appropriate maturities to optimise the cash returns on investments while ensuring sufficient liquidity to meet its liabilities.

The following table shows the maturity analysis of the Group's financial liabilities based on contractually agreed undiscounted cash flows as at the date of Restated Consolidated Statement of Assets and Liabilities.

| The Group is mainly exposed to the interest rate risk due to its investment in government securities. The interest rate risk arises due to uncertainties about the future market interest rate of these investments.                                                                   | In order to manage its price risk arising from investments in mutual funds, exchange traded funds and investments in equity instruments, the Group diversifies its portfolio in accordance with the limits set by the risk management policies. | As an estimation of the approximate impact of the interest rate risk, with respect to financial instruments, the Group has calculated the impact of a 0.25% change in interest rates.                                                                                                                                                                                                                                                                       |
| The Group invests in term deposits for a period of less than one year. Considering the short-term nature, there is no significant interest rate risk pertaining to these deposits.                                                                                                     | The Treasury department maintains a list of approved financial instruments. The investment in any new instrument must be approved by the treasury committee within the criteria's approved by the Board.                                        | A 0.25% increase in interest rates would have led to approximately an additional loss in the Restated Consolidated Statement of Profit and Loss of ₹94.73 million for the three months period ended June 30, 2026 (June 30, 2025: ₹143.11 million; March 31, 2026: ₹103.26 million; March 31, 2025: ₹150.37 million loss and March 31, 2024: ₹194.59 million loss). A 0.25% decrease in interest rates would have led to an equal but opposite effect.      |

**C MANAGEMENT OF FOREIGN EXCHANGE RISK**

Group enters transactions requiring remittance in foreign currency at a future date. Group uses forward contracts to manage its exposure to currency fluctuations on foreign exchange settlements arising from anticipated payment remittance transactions. Forward contracts are governed by the forex risk management policy as approved by the Board of NSE and are used as part of Group's risk management strategy to mitigate the impact of exchange rate volatility. Group follows the Mark-to-Market (MTM) method for accounting of these foreign exchange forward contracts and measure the open contracts at each reporting date at fair value. Any gains or losses arising from changes in fair value and cancellation/rollover of the forward contracts are recognised in the Restated Consolidated Statement of Profit and Loss.

**D MANAGEMENT OF CREDIT RISK**

Credit risk is the risk of financial loss to the Group if a customer or counter-party fails to meet its contractual obligations.

**Trade receivables**

Concentrations of credit risk with respect to trade receivables are limited, due to the Group's customer base being large and diverse and also on account of member's deposits kept by the Group as collateral which can be utilised in case of member default. All trade receivables are reviewed and assessed for default on a quarterly basis. Based on historical experience of collecting receivables, supported by the level of default, the Group's assessment of credit risk is low. Accordingly, provision for expected credit loss on trade receivables is not material as they are settled fairly quickly.

**Other financial assets**

Group maintains exposure in cash and cash equivalents, term deposits with banks / financial institutions and investments in marketable debt investments including the government securities, mutual funds and exchange traded funds. The Group has diversified portfolio of investments with various number of counter-parties which have secure credit ratings hence the risk is reduced. Individual risk limits are set for each counter-party based on financial position, credit rating and past experience. Credit limits and concentration of exposures are actively monitored by the Group's Treasury department. The Group's investments are primarily into AAA / AA high rating instruments and based on the historical experience of investee company, the Group's assessment for credit risk is low. Accordingly, the provision for expected credit loss on other financial assets is not material.

The Group's maximum exposure to credit risk as at June 30, 2026, June 30, 2025, March 31, 2026; March 31, 2025 and March 31, 2024 is the carrying value of each class of financial assets as disclosed in note 4, 5, 6, 9, 10, 11 and 12.

**I Fair Value Measurements**

**(i) Fair Value hierarchy and valuation technique used to determine fair value :**

This section explains the judgements and estimates made in determining the fair values of the financial instruments that are (a) recognised and measured at fair value and (b) measured at amortised cost and for which fair values are disclosed in the Restated Consolidated Financial Information. To provide an indication about the reliability of the inputs used in determining fair value, the Group has classified its financial instruments into the three levels prescribed under the accounting standard. An explanation of each level follows underneath the table.

The fair value of financial instruments as referred to in note above have been classified into three categories depending on the inputs used in the valuation technique. The hierarchy gives the highest priority to quoted prices in active market for identical assets or liabilities (level 1 measurements) and lowest priority to unobservable inputs (level 3 measurements). The categories used are as follows :

**- Level 1:**

This includes financial instruments measured using quoted prices in an active market. This includes listed equity instruments and mutual funds that have quoted price/ declared NAV. The fair value of all equity instruments which are traded on the stock exchanges are valued using the closing price as at the end of the reporting period/year. Listed Mutual Funds are valued using the closing quoted NAV.

**- Level 2:**

The fair value of financial instruments that are not traded in an active market (for example, government securities is determined using Financial Benchmarks India Private Limited valuation techniques which maximise the use of observable market data, fixed maturity plan based on NAV declared by the funds) and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

**- Level 3:**

If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities included in level 3.

- The Group's policy is to recognise transfers into and transfers out of fair value hierarchy level as at the end of reporting period/year.

- There were no transfers between levels during the three months periods ended June 30, 2026 and June 30, 2025 and years ended March 31, 2026; March 31, 2025 and March 31, 2024.

**ii) Valuation technique used to determine fair value :**

Specific valuation techniques used to value financial instruments include:

- The use of quoted market prices or dealer quotes for similar instruments

- The fair value of the remaining financial instruments is determined using discounted cash flow analysis and price to book value multiple as applicable.

**(iii) Fair value measurements using significant unobservable inputs (level 3)**

The following table presents the changes in level 3 items for the three months periods ended June 30, 2026 and June 30, 2025 and years ended March 31, 2026; March 31, 2025 and March 31, 2024.

The carrying amounts of trade receivables, trade payables, deposits, cash and cash equivalent including other current bank balances and other financial assets and financial liabilities are considered to be approximate as their fair values, due to current and short term nature of such balances.

The fair value of taxable bonds, tax-free bonds, certificate of deposit with banks, government securities, fixed deposits and security deposit are based on discounted cash flow.

For financial assets and liabilities that are measured at fair value, the carrying amounts are equal to the fair values.

Significant estimates

The fair value of financial instruments that are not traded in an active market is determined using valuation techniques. The Group uses its judgement to select a variety of methods and make assumptions that are mainly based on market conditions existing at the end of each reporting period.

### Significant Factors Affecting Our Financial Condition and Results of Operations

#### *Increase in trading volumes*

We earn fees from trading activity across our stock exchange. The fees we earn is driven principally by the volume of trades

executed across our various trading products, including the cash market, futures, options, mutual funds platform, commodity derivatives, exchange-traded currency derivatives, wholesale debt market and interest rate futures, among others. Revenue from transaction charges constituted 79.44% and 78.65% of our total revenue from operations in the three months period ended June 30, 2026 and Fiscal 2026, respectively, making trading volumes a primary driver of our revenue. We define trading volumes or Average Daily Trading Volume (“ADTV”) as the average volume of securities traded per day across different products over a given period.

We maintain leading market share positions in India across key asset classes, with market share of 92.99% and 93.05% in cash market (based on total turnover), 99.79% and 99.72% in equity futures (based on total turnover), 74.71% and 68.48% in equity options (based on total premium turnover) in Fiscal 2026 and the three months period ended June 30, 2026, respectively. Further, we had a market share of 85.65% and 81.15% in value of trades in listed and unlisted corporate bonds executed (executed on over the counter, request for quote and anonymous platform settled through clearing corporations in India) in Fiscal 2026 and the three months period ended June 30, 2026, respectively. Additionally, we had a market share of 99.48% and 100.00% in exchange-traded currency futures (based on total turnover), and a market share of 100.00% and 100.00% for exchange-traded currency options (based on total premium turnover) in Fiscal 2026 and the three months period ended June 30, 2026, respectively. Additionally, we had a market share of 71.38% in number of lots traded in electricity futures from July 14, 2025 to March 31, 2026, and a market share of 53.52% in number of lots traded in electricity futures from April 1, 2026 to June 30, 2026. The Indian cash market recorded a turnover of ₹280.26 trillion in Fiscal 2026, compared to ₹49.77 trillion in Fiscal 2016, reflecting an approximate ~6x increase over the period. This growth is structurally anchored to four components: nominal GDP growth, expansion of market capitalisation relative to GDP, availability of free float, and a growing investor base. The Indian cash market is projected to grow to ₹473-507 trillion by Fiscal 2030, implying a CAGR of 14-16%. In addition, corporate bond turnover is projected to grow at a CAGR of 13-18% between Fiscal 2026 and Fiscal 2030, reaching ₹35-41 trillion by Fiscal 2030. Furthermore, the exchange-traded currency and commodity futures turnover is expected to grow at a combined CAGR of 15-20% over the same period, reaching ₹307-363 trillion by Fiscal 2030. Over the same period, exchange-traded currency options and commodity options total premium turnover is projected to grow at a CAGR of 20-25%, reaching ₹35-41 trillion by Fiscal 2030. Together, these segments are underpinned by regulatory oversight, corporate and institutional participation, and continued broadening of product offerings (*Source: Redseer Report*).

These growth trajectories underscore the significant potential for sustained revenue expansion across our trading products.

We also launched electricity futures contracts in July 2025, enabling power producers, utilities and large consumers to hedge electricity price risks, and expanded our international product suite at NSE International Exchange (“NSEIX”) with the launch of Nifty 50 Index Options with Daily Expirations (ODTE) and derivative contracts on the Nifty India FPI 150 Index, broadening the range of instruments available to global market participants. In addition, we have introduced electronic gold receipts on our platform, enabling transparent, standardised and efficient trading and settlement of gold in dematerialised form. Further, we have expanded our commodity derivatives offering to include new products such as 10-gram gold futures contracts, Brent crude oil futures and Indian natural gas futures. We recently announced our collaboration with S&P Global Energy to launch derivatives on Platts benchmarks, followed by the launch of Dated Brent Crude Oil (Platts) Futures. In April 2026, we received SEBI approval to establish a dedicated unit for a national coal trading exchange, intended to create a transparent, electronic platform for the buying and selling of domestically produced coal. Subsequently, National Coal Exchange of India Limited was incorporated on June 19, 2026, as a wholly owned subsidiary of our Company.

Trading volumes are primarily influenced by several factors, including:

- *new listings and capital-raising activity* expanding the investable universe on our stock exchange.
- *increase in institutional participation*, driven by robust growth in mutual fund assets under management, systematic investment plan contributions and the deepening of index-linked investment strategies.
- *the growth of passive investment products* - such as exchange-traded funds and index funds linked to Nifty Indices. The total index funds and ETFs (excluding gold and silver) AUM in India stood at ₹11.22 trillion and ₹12.33 trillion as of March 31, 2026 and June 30, 2026, respectively. Of this, ₹8.14 trillion and ₹8.95 trillion was tracked by Nifty Indices, implying a share of 72.53% and 72.59% as of March 31, 2026 and June 30, 2026, respectively, according to the Redseer Report, which channel incremental flows into our markets.
- *the continued penetration of retail investors into India's capital markets* - aided by digital onboarding and rising financial awareness, with our Unique Registered Investor base having grown at a CAGR of 26.23% from 30.87 million as of March 31, 2020 to 132.37 million as of June 30, 2026, spanning over 99% of India's postal codes.
- *broader macroeconomic conditions and market sentiment*, which affect overall trading appetite and volumes. According to the Redseer Report, the Indian economy, in terms of nominal GDP, has expanded from US\$0.47 trillion in Fiscal 2001 to US\$3.92 trillion in Fiscal 2026. In Fiscal 2028, India's nominal GDP is projected to reach US\$4.58 trillion, ranking it as the fourth-largest economy globally. As a result, we believe that continued growth of the Indian economy, together with ongoing economic liberalisation by the Government of India, may lead to further expansion of the Indian capital markets and present additional opportunities for us to grow our business.

Note: (1) The increase in mutual fund platform orders was primarily driven by the launch of NSE MF Invest, a re-engineered platform with enhanced capabilities and efficiencies, which led trading members, along with other mutual fund distributors, to increase their trading volumes on NSE.

- *Our platform also benefits from large network effects:* a growing investor base leads to higher trading volumes, enhancing market efficiency and liquidity, which in turn attracts more issuers, broadens investor choice and generates datasets that enhance our ability to launch new products and services. These compounding dynamics, combined with our leadership position, underpin the structural and compounding nature of our volume growth. Further, as issuers expand the investable universe through new listings and capital-raising activities on our platform it creates greater liquidity and improves return on capital for issuers, further strengthening our position as the platform for capital formation. The chart below shows listing activity and capital raised on our stock exchange:

## Regulatory Oversight and Governmental Policies

We operate in a highly regulated industry and are subject to extensive regulation. We are a “first level regulator” in India, and in that role are committed to providing equal, unrestricted, transparent and fair access to the stock market to all market participants, including investors, issuers and intermediaries, while maintaining orderly and efficient market functioning and safeguarding investor interests. SEBI regulates us and has broad powers to approve or consent to proposals made by us, whether with respect to rule amendments, product range or infrastructure or market development initiatives. SEBI may also conduct periodic reviews, audits and inspections and issue suspension orders of our stock exchange. While regulation can constrain certain activities, it also reinforces market integrity and investor confidence, which are foundational to sustained volume growth. Below are some examples of key recent regulations introduced by SEBI and RBI that impacted our results of operations:

- In January 2024, RBI issued revised directions governing exchange traded currency derivatives traded on stock

exchanges and clearing corporations. Under the updated framework, these entities shall not deal in or otherwise undertake the business relating to foreign exchange derivatives unless they hold an authorisation issued by the RBI. Stock exchanges are permitted to offer foreign exchange derivative contracts in specified currency pairs to both resident and non-resident participants, with the RBI mandating that exchange-traded rupee derivatives be used only for hedging purposes, alongside documentation and position limit requirements designed to ensure activity reflects genuine exposure. In addition, where a participant's open position exceeds US\$100 million, the relevant stock exchange must report day-end and intra-day peak position data to the designated authorised dealer or custodian. These changes were one of the reasons for a decline in currency derivatives volumes.

- SEBI introduced a series of measures during Fiscal 2025 and Fiscal 2026 to strengthen the equity index derivatives framework, implemented in phases. Among the most structurally significant were the rationalisation of weekly expiries for index options, restricting each exchange to a single weekly expiry for one benchmark index effective November 2024, and the standardisation of expiry days across exchanges, with our contracts moving to Tuesday expiry effective September 2025. Additional measures included increasing the minimum contract size for index derivatives, imposing additional margin requirements on short options contracts on expiry days, mandating upfront collection of option premiums, tighter position limit monitoring, refined methodologies for measuring open interest and effective exposures, enhanced intraday surveillance mechanisms and recalibration of risk management and margin frameworks for index derivatives. These measures increased margin discipline, reduced the scope for concentrated or leveraged short-term positioning, and aligned derivatives activity more closely with underlying cash market liquidity, according to the Redseer Report. While intended to curb excessive speculation and protect retail investors, these measures have moderated speculative turnover and contributed to a decline in trading volumes in equity futures and equity options and related revenue in Fiscal 2026.
- Pursuant to SEBI's circular dated October 1, 2024, clearing corporations with a clearing volume share of 40% or more are required to maintain a minimum Core Settlement Guarantee Fund ("**Core SGF**") corpus of ₹105,000 million for equity derivatives products. This requirement reflects the introduction of additional stress testing scenarios for determining the minimum Core SGF corpus. On March 23, 2023, the Governing Board approved a voluntary contribution of 2% of transaction charges to the Core SGF. Accordingly, NSE Clearing Limited ("**NCL**") augmented the Core SGF corpus to the prescribed minimum of ₹105,000 million for equity derivatives products, achieving compliance by December 31, 2024. Subsequently, in February 2025, our Governing Board approved the discontinuation of our voluntary contribution of 2% of transaction charges to the Core SGF with effect from January 1, 2025, following the Core SGF having been adequately funded. Accordingly, during Fiscal 2026, we contributed ₹5.76 million to the Core SGF, as against ₹2,340.89 million contributed in the preceding Fiscal 2025. During the three months period ended June 30, 2026, a further contribution of ₹50.00 million by NSE and ₹50.00 million by NCL was made to the Core SGF towards new products added in electronic gold receipts. Additionally, ₹2,500.00 million earmarked from General Reserves for the Commodity Derivatives SGF in Fiscal 2019 was de-allocated and reinstated during Fiscal 2024, pursuant to SEBI's approval dated January 31, 2024.
- SEBI issued its "True to Label" circular on July 1, 2024, requiring stock exchanges and other market infrastructure institutions to adopt a uniform charge structure for all members. Previously, members could collect charges from end clients at higher rates while paying the exchange at lower aggregate rates. This circular eliminated this practice by requiring that charges recovered from clients correspond to those received by the stock exchanges. While this required us to redesign our transaction charge structures, the revised pricing closely replicated our existing average realisation rates and did not have a material impact on our revenue.
- Pursuant to the Union Budget for Fiscal 2027, Securities Transaction Tax (STT) rates applicable to equity derivatives were revised with effect from April 1, 2026. STT on equity futures increased from 0.02% to 0.05% of the contract value, STT on equity options premium was increased from 0.10% to 0.15%, and STT on option exercise was increased from 0.125% to 0.15%. These revisions were introduced with the stated objective of curbing excessive speculative trading in the futures and options products, and the higher transaction cost structure may affect participation levels, particularly in high-frequency or leveraged strategies, and could moderate derivatives turnover and liquidity depth, while STT on delivery-based equity transactions remains unchanged. Our Company's contribution to exchequer (including collections and payments) is ₹ 593.27 billion in Fiscal 2026, of which STT/Commodity Transaction Tax (CTT) is ₹ 483.47 billion, income tax is ₹ 46.18 billion, stamp duty is ₹ 34.11 billion, GST is ₹ 19.43 billion and fees paid to SEBI is ₹ 10.08 billion. Of the total STT/CTT of ₹ 483.47 billion, cash market (delivery based) segment constituted 46.82%, cash market (intraday) segment constituted 7.20%, and equity derivatives segment constituted 45.98%. Our Company's contribution to exchequer (including collections and payments) is ₹205.76 billion in the three months period ended June 30, 2026, of which STT/Commodity Transaction Tax (CTT) is ₹183.13 billion, income tax is ₹3.73 billion, stamp duty is ₹9.80 billion, GST is ₹6.57 billion and fees paid to SEBI is ₹ 2.54 billion, respectively. Of the total STT/CTT of ₹183.13 billion, cash market (delivery based) segment constituted 36.73%, cash market (intraday) segment constituted 6.35%, and equity derivatives segment constituted 56.92% in the three months period ended June 30, 2026.
- Pursuant to SEBI's Circular dated January 16, 2026, closing auction session ("**CAS**") has been introduced in the equity cash segment of stock exchanges and revised the pre-open auction session framework. Initially, CAS will apply only to stocks in the cash segment for which derivative contracts are available and the closing price for other securities continues to be determined based on volume weighted average price of trades executed during the last 30 minutes of

the continuous trading session. The framework for CAS has become effective from August 3, 2026 and the framework for pre-open auction session revised the duration of certain sessions within the pre-open auction window which will become effective from September 7, 2026.

- Pursuant to the Reserve Bank of India (Commercial Banks – Credit Facilities) Amendment Directions, 2026 (Revised) dated March 30, 2026 (“**Directions**”), a new chapter, Chapter XIII A – Credit Facilities to Capital Market Intermediaries (“**CMI**”) has been inserted, applicable to lending to CMIs, as defined under the Directions. The Directions enables banks to extend need-based credit facilities to CMIs for day-to-day operations, including margin trading and settlement-related timing mismatches, issue guarantees on behalf of brokers/clearing members in favour of exchanges or clearing houses, and custodian banks may issue irrevocable payment commitments, in favour of a clearing corporation of a stock exchange. Barring specified exceptions, all credit facilities to CMIs, including intraday facilities, must be fully secured (100 per cent collateral). These amendments come into force from July 1, 2026, or an earlier date when adopted by a bank in entirety.

Changes in policies by GoI or foreign governments may relate to, among others, monetary or tax law or policy, tax treaties, regulatory changes in India regarding foreign portfolio investors, the listing requirements on competing stock exchanges, changes affecting the ability of investors to freely trade on our platforms, the taxation or repatriation of profits from trading on international exchanges, or changes to the manner in which securities are traded, cleared and settled. Such changes, if favourable, may attract increased trading activity to our stock exchange, while adverse changes could affect market participation, trading volumes, and the overall competitiveness of our stock exchange. Further, regulatory developments can also serve as catalysts for new product categories and market expansion. For instance, we received SEBI approval in April 2026 to establish a dedicated national level coal trading exchange, introducing standardised contracts designed to improve price discovery in a traditionally unorganised coal sector. Subsequently, National Coal Exchange of India Limited was incorporated on June 19, 2026, as a wholly owned subsidiary of our Company. In addition, we conducted 17,916 and 1,030 investor awareness and financial literacy programmes, reaching 941,877 and 51,767 participants across India during Fiscal 2026 and the three months period ended June 30, 2026, respectively, and we maintain the NSE Investor Protection Fund Trust, both of which contribute to sustaining investor confidence and broadening the participant base that underpins our trading volumes.

### **Investments in Technology**

Technology is fundamental to the operation of our business. We are India’s largest screen-based trading platform with market leadership across asset classes, according to the Redseer Report. Our platform processed an average of 12.46 billion messages daily during the period from April 1, 2024 to June 30, 2026, with 21.89 billion peak order messages processed in a single day on March 24, 2026, on which date 201.00 million trades were executed and on June 4, 2024, our platform processed a total of 293.85 million peak trades in a single day. The platform can also process ~5 million messages per second with microsecond response time for cash market, equity derivatives and exchange-traded currency derivatives. As of June 30, 2026, our infrastructure comprised seven data centres with points of presence across 30+ locations supporting over 14,000 physical and virtual servers across all NSE entities including more than 8,000 servers in production and DR sites and over 6,000 servers in development, test and UAT. The infrastructure houses 2,694 Full Rack Equivalent (“**FRE**”) racks, ~60 petabytes of enterprise storage capacity and power backup exceeding 14 MW and connecting over 200,000 trading terminals across 1,400 cities and towns. Of the 2,694 FRE racks, 1,868 FRE racks are member colocation racks which have capacity to host more than 12,000 member servers, and 826 FRE racks are dedicated to our internal operations. We have an experienced team of IT professionals, supported by select third-party IT vendors, who operate and maintain our infrastructure and software and develop and implement new technologies. Our advanced electronic systems for trade execution and post-trade services, including clearing, settlement and risk management, provide reliable and consistent transaction execution and settlement. In addition, SEBI and other regulatory bodies require us to continually upgrade our technology infrastructure to maintain resilience, security and compliance. As a result, we incur expenses for maintaining and upgrading our IT infrastructure. These investments reflect our commitment to maintaining and enhancing the resilience, scalability and security of our platform. The following table provides a breakdown of the expenses we have incurred towards our technology infrastructure for the period/year indicated:

We continue to make sustained and proactive investments in upgrading and modernising our technology stack to ensure our platform remains robust and responsive to the evolving needs of India's capital markets. To mitigate the risk of system outages or disruptions, we ensure that our systems have built-in redundancy and excess capacity. During Fiscal 2026, our technology investment programme focused on infrastructure upgrades, modernising backup solutions, hyper-automation and strengthening our talent pool through upskilling across key technology domains as well as segregating our technology infrastructure across our regulated Subsidiaries. We are also exploring advanced technologies such as observability platforms, which provide real-time insight into applications and infrastructure to detect anomalies early, minimise downtime and strengthen operational resilience, and enhanced security information and event management tools to further improve operational efficiency, increase ease of compliance and strengthen surveillance and risk management. We expect that advances in technology will enable us to expand access to our stock exchange for existing and new market participants, provide more efficient trade execution services and increase our economies of scale. For additional information on our technology strategy, see “*Our Business – Our Strategies – Further our commitment to technology infrastructure and continuous modernisation*” on page 220.

### ***Interest rates and funds available for investment***

We earn income from investment and treasury activities. The funds available for investment are primarily derived from two principal pools: (a) margin funds, comprising cash collaterals from clearing members and deposits received from trading members; and (b) our own surplus funds. These funds are invested primarily in government securities, fixed deposits, mutual funds (including overnight and liquid schemes of the highest credit quality) and corporate bonds, in accordance with our investment policy and applicable SEBI prudential norms. On our balance sheet, the investments attributable to each of these pools are reported under “Investments” (both non-current and current), other financial assets (non-current), cash and cash equivalents, and “bank balances other than cash and cash equivalents”. The income earned on such investments depends principally on (i) prevailing interest rates and market rates of return, and (ii) the quantum of funds available for investment across each of the two pools described above, which are in turn influenced by the macroeconomic environment in India and levels of market activity. The key characteristics of each pool are as follows:

- **Margin fund-** NCL and NSEICC requires its clearing members to deposit collateral for margin trading and settlement of trades. These deposits are held by NCL and NSEICC at banks primarily as fixed deposits that can be redeemed at short notice. Under Ind AS, since the deposits are made with NCL and NSEICC, they appear on our Restated Consolidated Statement of Assets and Liabilities as bank balances on the asset side, with a corresponding liability entry. The quantum of cash collateral available for investment is determined by the margin policy applicable to the relevant trade, prevailing levels of market activity and open interest, and the applicable settlement period. As trading volumes and open interest increase, the pool of margin funds available for investment correspondingly expands, and vice versa. As of June 30, 2026 ₹260,124.27 million, pertained to settlement obligations and margin money from members, compared to ₹301,466.62 million as of March 31, 2026, ₹158,798.86 million as of March 31, 2025 and ₹213,271.10 million as of March 31, 2024.
- **Own surplus funds-** Our profitability is underpinned by consistent and sustained cash generation, and we had no outstanding loans or borrowings as of June 30, 2026. However, certain bank guarantees have been availed for our clearing operations. We have an active treasury management function that invests our own surplus funds, generating investment income which is classified as other income. This pool is influenced by our retained earnings, dividend distribution policy and capital allocation decisions. We maintain a risk reserve by earmarking certain of our treasury investments on our balance sheet, as determined by our Governing Board on an annual basis. This reserve is earmarked on a voluntary basis, out of retained earnings, as a buffer against potential losses arising from risks inherent in our business activities, including operational risk, member default risk and other extreme but plausible scenarios of exposures inherent to the Exchange's activities. We assessed reserve requirement towards adequate risk capital management and transferred an excess amount of ₹37,280.00 million for the Fiscal 2026, from risk reserves to retained earnings within equity leading to a decrease in the risk reserve to ₹48,050.00 million as of March 31, 2026 from ₹85,330.00 million as of March 31, 2025. As of June 30, 2026 and June 30, 2025, the risk reserve was ₹48,050.00 million and ₹85,330.00 million, respectively. As of June 30, 2026, the investments earmarked towards the risk reserve amounted to ₹28,704.00 million within non-current investments, and ₹19,346.00 million within current investments. The reduction in risk reserves from June 30, 2025 to June 30, 2026, and from March 31, 2025 to March 31, 2026, primarily reflected revised assessments relating to member defaults, including enhanced safeguards such as the pledge/re-pledge framework and upstreaming of cash collateral, periodic assessment of the adequacy of the Investor Protection Fund Trust corpus, and periodic stress-testing of our Company's investment portfolio for credit and market risks in line with our investment policy.

## **Key Components of Our Restated Consolidated Statement of Profit and Loss**

### ***Revenue from operations***

Our revenue from operations comprises (i) revenue from contract with customers, and (ii) other operating revenues.

#### **Revenue from contract with customers:**

- **Transaction charges:** represents fees we earn from trading activity across our stock exchange (including NSEIX). We generate transaction charges primarily from the cash market, futures and options. We also earn revenue from trading activity through the mutual funds platform, commodity derivatives, exchange-traded currency derivatives, wholesale

debt market and interest rate futures. Transaction charges differ based on the type of product.

- *Listing services:* comprise listing fees, book building fees and processing fees, which are fees charged to issuers for using our electronic bidding systems. Entities that list their securities on our Exchange (as well as NSEIX) pay one-time initial listing fees, book building fees and processing fees at the time of listing. The initial listing fee is a fixed amount that is reviewed periodically, while book building and processing fees are determined based on the size of a company's proposed securities offering. In addition, entities pay a recurring annual listing fee at the beginning of each year that their securities remain listed on our stock exchange in an amount determined based on total paid-up share capital, bond or debenture capital as well as market capitalisation of companies.
- *Data Centre – Rack charges:* are fees we receive from providing colocation data centre facilities to members of our Exchange and NSEIX. Rentals as well as incidental charges collected from members for providing racks are also classified under Data Centre - Rack charges.
- *Data Connectivity charges:* are the fees paid by market participants (such as brokers, institutional investors and high-frequency traders) to our Exchange and NSEIX, to establish and maintain a physical or virtual link to connect and transact on the exchange's trading system with charges determined based on subscription to different categories of Messages Per Second (MPS) per asset class.
- *Data Feed & Terminal services:* include income generated from our data feed and terminal business, providing trading data (including real-time market data) sourced from our stock exchange through our online data feed service, data subscription packages, and data terminal services fees. We operate this business through our Subsidiaries, NSE Data & Analytics Limited and Cogencis Information Services Limited.
- *Licensing services:* comprises fees for licensing our Nifty Indices for launching products linked to Nifty Indices to asset managers, to stock exchanges for introducing index linked derivatives contracts and other intermediaries such as brokers, investors, etc. that monitor the equity capital markets and derive revenue from usage of indices. We operate these indices through our Subsidiary, NSE Indices Limited.
- *Clearing & Settlement Services:* comprises revenue from Clearing & Settlement Services provided by our clearing corporation to market participants. We provide our Clearing & Settlement Services through our Subsidiaries, NCL and NSE IFSC Clearing Corporation Limited ("NSEICC").
- *Others:* primarily includes our remaining revenue streams that are not directly attributable to the services mentioned above, such as income from various ancillary services.

#### Other operating revenue:

Other operating revenue primarily includes income from investments that is generated from sources of funds related to our operating activities. Income from investments primarily includes income that we derive from investing margin funds and cash collaterals received from clearing members as well as deposits received from trading members. We invest these funds primarily in government securities, corporate bonds, mutual funds and bank deposits. We follow our investments policy that is governed by prudential norms of investment and the SEBI guidelines (wherever applicable) in investing these funds and we earn interest income and income from redemption of units in mutual funds.

The following table sets out the amount and percentage share of our revenue from operations from each of our primary business lines:

## **Contribution to Core Settlement Guarantee Fund**

The Core SGF must be held in a separate account and serves as a financial safeguard to ensure timely settlement of trades in the event of clearing member defaults. SEBI guidelines prescribe how these funds may be used, and we cannot use the Core SGF for any purpose other than investment in safe, liquid instruments. The Core SGF is invested in government securities, fixed deposits and debt schemes of mutual funds (overnight and liquid schemes of the highest credit quality), with the income from such investment added to corpus. As of June 30, 2026 and March 31, 2026, earmarked amounts pertaining to the Core SGF included ₹43,246.94 million and ₹51,876.84 million in non-current investments in quoted government securities at amortised cost, ₹13,118.26 million and ₹8,729.39 million in current investments in quoted government securities at amortised cost, ₹10,090.17 million and ₹9,914.02 million in current investments in unquoted mutual funds at FVTPL, accrued interest of ₹46.37 million and ₹226.72 million shown under other financial assets (non-current) and ₹2,022.92 million and ₹1,975.97 million shown under other financial assets (current), ₹2,900.10 million and ₹2,453.00 million in current accounts under bank balance other than cash and cash equivalents, ₹51,529.36 million and ₹47,327.29 million in fixed deposit with remaining maturity of less than 12 months and ₹10,886.99 million and ₹8,280.24 million in fixed deposit with remaining maturity of more than 12 months under other financial assets (non-current), respectively.

On March 23, 2023, our Board approved a voluntary contribution of 2% of transaction charges to the Core SGF. Following SEBI's mandate requiring a minimum corpus of ₹105,000 million for equity derivatives products for clearing corporations with 40% or more clearing volume share, NCL achieved compliance by December 31, 2024. Consequently, on February 4, 2025, our Board approved discontinuation of the voluntary contribution with effect from January 1, 2025. Accordingly, during Fiscal 2026, our Company contributed ₹5.76 million to the Core SGF, as against ₹2,340.89 million contributed in the preceding Fiscal 2025. During the three months period ended June 30, 2026, a further contribution of ₹50.00 million by NSE and ₹50.00 million by NCL was made to the Core SGF towards new products added in electronic gold receipts. Additionally, ₹2,500.00 million earmarked from General Reserves for the Commodity Derivatives SGF in Fiscal 2019 was de-allocated and reinstated during Fiscal 2024, pursuant to SEBI's approval dated January 31, 2024. See “– Key Components of Our Restated Consolidated Statement of Profit and Loss – Contribution to Core Settlement Guarantee Fund” and “Restated Consolidated Financial Information – Notes to the Restated Consolidated Financial Information – Note 36 – Core Settlement Guarantee Fund” on pages 406 and 372, respectively.

## **Tax expenses**

Our tax expense includes current tax and deferred tax. Provisions for current tax are made based on the estimated taxable income for the current accounting period in accordance with the provisions of the Income Tax Act, 1961. Deferred tax results from temporary differences (related to timing) between the book and the taxable profits for the period and is accounted for using the tax rates and laws that have been enacted or substantively enacted as of the balance sheet date.

#### Other income

Our other income increased by 29.52% to ₹20,361.53 million in Fiscal 2025 from ₹15,720.51 million in Fiscal 2024, due to an (a) increase in interest income from financial assets at amortised cost to ₹7,429.50 million in Fiscal 2025 from ₹5,555.17 million in Fiscal 2024, largely on account of higher investable surplus (due to higher STT collection on account of increased average daily volume across cash equity and futures), (b) increase in other Gains/(losses) on financial assets measured at FVTPL to ₹6,422.82 million in Fiscal 2025 from ₹6,285.91 million in Fiscal 2024, and (c) increase in other gains on sale of financial assets measured at FVTPL to ₹3,773.65 million in Fiscal 2025 from ₹1,337.27 million in Fiscal 2024.

#### **Expenses**

##### *Employee benefits expenses*

Our employee benefits expenses increased by 45.99% to ₹6,721.40 million in Fiscal 2025 from ₹4,603.99 million in Fiscal 2024, primarily due to an increase in salaries and bonuses and one-time impact of leave encashment policy of ₹439.74 million

in Fiscal 2025. The increase was primarily attributable to an increase in our headcount to 2,593 employees as of March 31, 2025 from 2,032 employees as of March 31, 2024, as well as annual increments and promotions.

#### *Regulatory fees*

Expenses on regulatory fees marginally decreased by 1.83% to ₹9,626.45 million in Fiscal 2025 from ₹9,805.73 million in Fiscal 2024, primarily due to reduction in notional turnover of equity options in Fiscal 2025 from Fiscal 2024.

#### *Depreciation and amortisation expenses*

Depreciation and amortisation expenses increased by 24.35% to ₹5,465.86 million in Fiscal 2025 from ₹4,395.51 million in Fiscal 2024, primarily due to higher depreciation on computer systems- others, tele-communication systems, clearing and settlement system, and buildings recognised as right-of-use assets added during Fiscal 2025.

#### *Other expenses*

Our other expenses increased by 51.88% to ₹26,249.21 million in Fiscal 2025 from ₹17,282.62 million in Fiscal 2024 primarily due to:

- *SEBI settlement fees*: Increased by 822.51% to ₹6,701.84 million in Fiscal 2025 from ₹726.48 million in Fiscal 2024. The increase was primarily attributable to higher settlement amounts paid during Fiscal 2025, including ₹6,430.53 million paid to SEBI pursuant to a settlement application in the TAP matter and ₹271.31 million paid by NCL to SEBI pursuant to a settlement application relating to alleged non-compliance with SECC Regulations and certain provisions of the SEBI circular dated November 27, 2018 regarding inter-CCP collateral under the interoperability among clearing corporations framework. By comparison, Fiscal 2024 settlement fees consisted principally of ₹497.68 million paid by NSE and ₹228.80 million paid by NCL to SEBI pursuant to settlement applications relating to a technical glitch that occurred on February 24, 2021.

- *Technology expenses*

Our technology expenses increased in Fiscal 2025 from Fiscal 2024, primarily due to:

- *Repairs and maintenance (to computers, trading & telecommunication systems)*: Increased by 93.60% to ₹1,825.94 million in Fiscal 2025 from ₹943.14 million in Fiscal 2024, primarily due to an increase in annual maintenance costs for hardware and software largely driven by segregation of our technology related infrastructure across the group;
- *IT Vendor Resources Expenses*: Increased by 5.79% to ₹3,032.56 million in Fiscal 2025 from ₹2,866.54 million in Fiscal 2024, primarily due to higher expenditure on information-technology infrastructure outsourcing contractual services;
- *IT management and consultancy charges*: Increased by 283.95% to ₹1,067.96 million in Fiscal 2025 from ₹278.15 million in Fiscal 2024, primarily attributable to change in accounting treatment of the fees paid to NSEIT on account of NSEIT ceasing to be a subsidiary of our Company since February 20, 2025 pursuant to its divestment under the share purchase agreement dated January 31, 2025;
- *Software expenses*: Increased by 22.75% to ₹2,847.75 million in Fiscal 2025 from ₹2,320.02 million in Fiscal 2024, on account of higher costs incurred for software licences;
- *Network infrastructure management charges*: Increased by 430.76% to ₹350.04 million in Fiscal 2025 from ₹65.95 million in Fiscal 2024, due to outsourcing of captive point-of-presence connectivity management;
- *Water and electricity charges*: Increased by 52.55% to ₹1,068.10 million in Fiscal 2025 from ₹700.17 million in Fiscal 2024, due to an increase in the rate of electricity and an increase in consumption driven by addition of member colocation racks during the year;
- *Advertisement and publicity*: Increased by 33.47% to ₹607.46 million in Fiscal 2025 from ₹455.11 million in Fiscal 2024, on account of higher spending on advertisements across television, radio, and print media;
- *Corporate social responsibility expenditure*: Increased by 19.58% to ₹1,748.82 million in Fiscal 2025 from ₹1,462.46 million in Fiscal 2024, corresponding to an increase in the average profits of our Company; and
- *Clearing & Settlement Charges*: Decreased by 36.27% to ₹802.76 million in Fiscal 2025 from ₹1,259.53 million in Fiscal 2024, primarily due to a reduction in trading volumes cleared on the other clearing corporation, other than by NCL and NSEICC.

## ***Contribution to Core SGF***

Our contribution to Core SGF decreased by 86.55% to ₹2,340.89 million in Fiscal 2025 from ₹17,409.72 million in Fiscal 2024 as the Core SGF has reached the desired corpus of ₹105,000 million for equity derivatives products as advised by SEBI in its letter dated May 3, 2024. ## ***Exceptional items***

Our profit on the sale of investment in associates, reported as exceptional items was ₹12,094.72 million during Fiscal 2025, arising from the sale of its entire stake of 20.34% in Protean eGov Technologies Limited resulting in a profit of ₹11,549.28 million and sale of part stake of 4.21% in Power Exchange India Limited resulting in a profit of ₹545.44 million. In comparison, profit on the sale of investment in associates of ₹814.35 million arising from the sale of 4.71% stake in Protean eGov Technologies Limited was reported as an exceptional item in Fiscal 2024.

## ***Tax expenses***

Our total tax expenses increased by 39.28% to ₹38,690.30 million in Fiscal 2025 from ₹27,778.00 million in Fiscal 2024. This was primarily due to an increase in our current tax on account of the increase in our profit before tax from Continuing Operations. This was partially offset by reduction in deferred tax expenses primarily due to a decrease in deferred tax liability on mark-to-market investments resulting from the reduction in the long-term capital gains tax rate from 20.00% to 12.50%.

## ***Profit for the year from Continuing Operations***

For the foregoing reasons, our profit for the year from Continuing Operations increased by 38.06% to ₹116,057.48 million in Fiscal 2025 from ₹84,064.80 million in Fiscal 2024.

Trade receivables as of June 30, 2026 decreased by 8.88% to ₹22,491.37 million from ₹24,682.13 million as of March 31, 2026, primarily due to lower trading volumes in June 2026 compared to March 2026. Trade receivables as of March 31, 2025 decreased by 18.90% to ₹15,122.24 million from ₹18,646.60 million as of March 31, 2024. This decrease was primarily attributable to lower unbilled amounts because of reduced trading volumes in March 2025.

Right of use assets increased by 436.06% from ₹4,211.33 million as of March 31, 2026 to ₹22,575.09 million as of June 30, 2026, primarily due to land taken on lease from Mumbai Metropolitan Region Development Authority (“MMRDA”) and renewal of existing lease for office premises, which was partially offset by depreciation charge on right of use assets during the three months period ended June 30, 2026. Right of use assets decreased by 20.67% from ₹5,308.40 million as of March 31, 2025 to ₹4,211.33 million as of March 31, 2026, primarily due to depreciation charge on right of use assets during Fiscal 2026, which was partially offset by the addition of new lease premises by NSE and NSE Clearing during Fiscal 2026. Further, right of use assets increased by 215.11% from ₹1,684.64 million as of March 31, 2024 to ₹5,308.40 million as of March 31, 2025, primarily due to the addition of new lease premises by NSE amounting to ₹4,294.72 million during Fiscal 2025.

### ***Total Liabilities***

Total liabilities marginally decreased by 0.11% from ₹427,447.50 million as of March 31, 2026 to ₹426,975.28 million as of June 30, 2026. Total liabilities increased by 58.09% from ₹270,380.64 million as of March 31, 2025 to ₹427,447.50 million as of March 31, 2026. Total liabilities decreased by 17.14% from ₹326,328.64 million as of March 31, 2024 to ₹270,380.64 million as of March 31, 2025. The rationale for fluctuations in the key components of total liabilities for the period between Fiscals 2024 to Fiscal 2026, and in the three months period ended June 30, 2026, is set forth below:

- Lease liabilities: Increased by 20.62% from ₹4,123.91 million as of March 31, 2026 to ₹4,974.10 million as of June 30, 2026, primarily due to renewal of existing lease for office premises. Further, it decreased by 18.53% from ₹5,062.05 million as of March 31, 2025 to ₹4,123.91 million as of March 31, 2026, primarily due to payment of lease rent and addition of interest on lease liabilities. Increased by 306.16% from ₹1,246.32 million as of March 31, 2024 to ₹5,062.05 million as of March 31, 2025, primarily due to addition of new lease premises by NSE, payment of lease rent and addition of interest on lease liabilities during the period.

- Other financial liabilities: Decreased by 13.23% from ₹309,302.25 million as of March 31, 2026 to ₹268,395.85 million as of June 30, 2026, primarily due to a reduction in margin money from members and settlement obligations payable to members. Further, it increased by 87.28% from ₹165,158.26 million as of March 31, 2025 to ₹309,302.25 million as of March 31, 2026, primarily due to an increase in margin money from members and settlement obligations payable to members. Decreased by 26.08% from ₹223,441.51 million as of March 31, 2024 to ₹165,158.26 million as of March 31, 2025, primarily due to a reduction in margin money from members and settlement obligations payable to members.

Increased by 43.99% from ₹886.29 million as of March 31, 2024 to ₹1,276.18 million as of March 31, 2025. The increase in both periods was primarily due to an increase in unamortised processing fees received from companies listed on the Exchange.
- Provisions: Decreased by 12.29% from ₹11,216.50 million as of March 31, 2026 to ₹9,838.34 million as of June 30, 2026, primarily due to reduction in gratuity provision on account of impact of New Labour Codes recognised in Fiscal 2026 and reduction in other employee benefit provisions during the three months period ended June 30, 2026, partially offset by increase in provision for compensated absences recognised in three months period ended June 30, 2026. Further, it increased by 376.74% from ₹2,352.77 million as of March 31, 2025 to ₹11,216.50 million as of March 31, 2026, primarily due to an increase in gratuity provision on account of the impact of New Labour Codes, provision for employee benefits expense and settlement fee payable to SEBI. Increased by 55.59% from ₹1,512.16 million as of March 31, 2024 to ₹2,352.77 million as of March 31, 2025, primarily due to provision for gratuity, leave encashment and other employee benefits made during the year.
- Trade payables: Increased by 6.49% from ₹5,041.02 million as of March 31, 2026 to ₹5,368.37 million as of June 30, 2026, primarily on account of provisions towards services availed during the three months period ended June 30, 2026. - Liabilities directly associated with assets classified as held for sale: Marginally increased by 11.12% from ₹142.94 million as of March 31, 2026 to ₹158.83 million as of June 30, 2026, primarily due to increase in liabilities of subsidiaries classified as held for sale. ## Liquidity and Capital Resources

Historically, our primary liquidity requirements have been to finance capital expenditures and working capital needs for our operations. We have met these requirements through cash flows from operations. We believe that after considering the expected cash to be generated from operations, we will have sufficient liquidity for our present requirements and anticipated requirements for capital expenditure and working capital for the next 12 months.

## **Quantitative and Qualitative Disclosures**

### ***Financial Risk Management***

Our business activities expose us to a variety of financial risks, namely liquidity risk, market risks and credit risk. Our risk management policies are established to identify and analyse the risks faced by us, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and our activities. Our senior management has the overall responsibility for developing and implementing our risk management policies. We have constituted a Risk Management Committee to oversee the implementation of our risk management policies. Our Risk Management Committee is supported by the Treasury Committee that provides assurance that our financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with our policies and risk objectives. We have a dedicated Treasury department to ensure investments are made as per the approved prudential norms of investment.

### ***Management of liquidity risk***

Liquidity risk is the risk that we will face difficulties in meeting our obligations associated with our financial liabilities. Our approach to managing liquidity is to ensure that we will have sufficient funds to meet our liabilities when due without incurring avoidable costs. In doing this, management considers both normal and stressed conditions. A material and sustained shortfall in our cash flow could impair investor confidence.

We maintain a cautious funding strategy, with a positive cash balance throughout the three months period ended June 30, 2026 and June 30, 2025, and the years ended March 31, 2026; March 31, 2025 and March 31, 2024. Cash flows from operating and investing activities provides the funds to service the financing of liabilities on a day-to-day basis.

Our treasury department regularly monitors the rolling forecasts to ensure we have sufficient cash on an on-going basis to meet operational needs. Any short term surplus cash generated by the operations, over and above the amount required for working capital management and other operational requirements, is retained as cash and cash equivalents (to the extent required) and any excess is invested in interest bearing deposits and other marketable debt investments not invested in equity linked funds including the government securities, mutual funds and exchange-traded funds with appropriate maturities to optimise the cash returns on investments while ensuring sufficient liquidity to meet our liabilities.

### ***Management of market risk***

Our size and operations result in us being exposed to the following market risks that arise from our use of financial instruments:

- price risk; and
- interest rate risk.

The above risks may affect our income and expenses, or the value of our financial instruments. The objective of our management of market risk is to maintain this risk within acceptable parameters, while optimising returns.

### ***Management of foreign exchange risk***

We enter transactions requiring remittance in foreign currency at a future date. We use forward contracts to manage our exposure to currency fluctuations on foreign exchange settlements arising from anticipated payment remittance transactions. Forward contracts are governed by the forex risk management policy as approved by the Board of National Stock Exchange of India Limited and are used as part of our risk management strategy to mitigate the impact of exchange rate volatility. We follow the Mark-to-Market (MTM) method for accounting of these foreign exchange forward contracts and measure the open contracts at each reporting date at fair value. Any gains or losses arising from changes in fair value and cancellation/rollover of the forward contracts are recognised in the Restated Consolidated Statement of Profit and Loss.

### ***Management of credit risk***

Credit risk is the risk of financial loss if a customer or counterparty fails to meet its contractual obligations.

#### ***Trade receivables***

Concentrations of credit risk with respect to trade receivables are limited, due to our customer base being large and diverse and also on account of members' deposits kept by us as collateral which can be utilised in case of member default. All trade receivables are reviewed and assessed for default on a quarterly basis. Based on historical experience of collecting receivables, supported by the level of default, our assessment of credit risk is low. Accordingly, provision for expected credit loss on trade receivables is not material as they are settled fairly quickly.

#### ***Other financial assets***

We maintain exposure in cash and cash equivalents, term deposits with banks / financial institutions and investments in marketable debt investments including the government securities, mutual funds and exchange-traded funds. We have a

diversified portfolio of investments with various number of counter parties which have secure credit ratings; hence the risk is reduced. Individual risk limits are set for each counter party based on financial position, credit rating and past experience. Credit limits and concentration of exposures are actively monitored by our Treasury department. Our investments are primarily into AAA / AA high rating instruments and based on the historical experience of investee company, our assessment for credit risk is low. Accordingly, the provision for expected credit loss on other financial assets is not material.

### **Capital management**

We consider the following components of our restated consolidated statement of assets and liabilities to be managed capital:

Total equity (as shown in the restated consolidated statement of assets and liabilities, including equity share capital, securities premium reserve, includes retained earnings and profits, other reserves).

We aim to manage our capital so as to safeguard our ability to continue as a going concern and to optimise returns to our shareholders. Our capital structure is based on management's judgement of the appropriate balance of key elements in order to meet our strategic and day-to-day needs. We consider the amount of capital in proportion to risk and manage the capital structure in light of changes in economic conditions and the risk characteristics of the underlying assets. This has been determined taking into consideration various factors and risks including market risk, credit risk, members default risk, operational risk, etc. In order to maintain or adjust the capital structure, we may adjust the amount of dividends paid to shareholders, return capital to shareholders or issue new shares.

Our policy is to maintain a stable and strong capital structure with a focus on total equity so as to maintain investor, creditor and market confidence and to sustain future development and growth of our business. We will take appropriate steps in order to maintain, or if necessary, adjust, our capital structure. We are not subject to financial covenants in any of our significant financing agreements.

Our management monitors the return on capital as well as the level of dividends to shareholders. Our goal is to continue to be able to return excess liquidity to shareholders by continuing to distribute dividends in future periods.

- (ii) Listing fees - Revenue for listing fees is recognised when the listing event has taken place, annual listing fees and processing fees in relation to listing are recognised on a straight-line basis over the period to which they relate.
- (iii) Book building fees – revenue is recognised at a point in time on completion of the book building process.
- (iv) Data Centre – Rack charges - revenue is recognised over the period of the contract with the customer. The revenue is calculated based on the specified charges for data centre racks and is recognised in the period in which the performance obligation is satisfied.
- (v) Data Connectivity charges - revenue is recognised over the period of the contract with the customer. Connectivity charges are the fees paid by the trading members of the Company to establish and maintain a physical or virtual link to the exchange's trading system.
- (vi) Clearing & Settlement Services - revenue in respect of clearing and settlement of transactions executed on Exchange is recognised in accordance with the fee scales at a point in time as and when the transaction is completed.
- (vii) Revenue from Technology services comprises Application Development and Maintenance services, E-learning Solutions, Online examination services, Infrastructure Management Services, IT security services and IT cloud services. Revenue from time and material and job contracts is recognised using the output method measured by units delivered, efforts expended, number of transactions processed, etc. Revenue related to fixed price maintenance and support services contracts, where we are standing ready to provide services is recognised based on time elapsed on a straight-line basis over the period of performance. In respect of other fixed-price contracts, revenue is recognised over a period of time using percentage-of-completion method of accounting with contract costs incurred determining the degree of completion of the performance obligation. The contract costs used in computing the revenues include cost of fulfilling warranty obligations. Revenue from online examination services is recognised on the basis of exams conducted and where there are multiple performance obligations, revenue is recognised using percentage-of-completion method of accounting with contract costs incurred determining the degree of completion of the performance obligation. Revenue from the sale of distinct third-party hardware is recognised at the point in time when control is transferred to the customer. The solutions offered by us may include supply of third-party equipment or software. In such cases, revenue for supply of such third-party equipment or software is recorded on a gross or net basis depending on whether we are acting as the principal or as an agent. We recognise revenue at the gross amount of consideration when we are acting as a principal and at net amount of consideration when we are acting as an agent.
- (viii) Subscription and other fees related to data feed & terminal services and licensing services – revenue is recognised over a period of time to which the fee relates.
- (ix) Other services – all other revenue is recognised in the period in which the performance obligation is satisfied over a period of time or point in time.
- (x) Financing Component – We do not have any contracts where the period between the transfer of the promised services to the customer and payment by the customer exceeds one year. As a consequence, we do not adjust any of the transaction prices for the time value of money.

We consider the terms of the contract in determining the transaction price. The transaction price is based upon the amount we expect to be entitled to in exchange for transferring of promised services to the customer after deducting allowances and incentives such as discounts, volume rebates etc. Revenue excludes any taxes and duties collected on behalf of the government.

In respect of members who have been declared as defaulters by us, all amounts (dues) remaining to be recovered from such defaulters, net of available security and insurance cover available if any, till the date of being declared as defaulters are written off as bad debts. All subsequent recoveries are accounted when received. In respect of Listed companies and other trade receivables where no such deposit is available with the exchange, as per the current practice, the amounts which are outstanding for more than 2 years are subject to 100% impairment. For amounts lying uncollected beyond a period of 3 years are written off. All subsequent recoveries are accounted when received.

### ***Business Combinations***

The acquisition method of accounting is used to account for all business combinations, regardless of whether equity instruments or other assets are acquired. The consideration transferred for the acquisition of a subsidiary comprises:

- the fair values of the assets transferred;
- liabilities incurred to the former owners of the acquired business;
- equity interests issued by us; and
- fair value of any asset or liability resulting from a contingent consideration arrangement.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are, with limited exceptions, measured initially at their fair values at the acquisition date. We recognise any non-controlling interest in the acquired entity on an acquisition-by-acquisition basis either at fair value or at the non-controlling interest's proportionate share of the acquired entity's net identifiable assets.

Acquisition-related costs are expensed as incurred. The excess of the purchase consideration, as given below, over the fair value of the net identifiable assets acquired as of the date of acquisition, is recorded as goodwill;

- consideration transferred;
- amount of any non-controlling interest in the acquired entity, and
- acquisition-date fair value of any previous equity interest in the acquired entity.

If the purchase consideration is less than the fair value of the net identifiable assets of the business acquired, the difference is recognised in other comprehensive income and accumulated in equity as capital reserve provided, there is clear evidence of the underlying reasons for classifying the business combination as a bargain purchase. In other cases, the bargain purchase gain is recognised directly in equity as capital reserve. Where settlement of any part of cash consideration is deferred, the amounts payable in the future are discounted to their present value as of the date of exchange. The discount rate used is the entity's incremental borrowing rate, being the rate at which a similar borrowing could be obtained from an independent financier under comparable terms and conditions. Contingent consideration is classified either as equity or a financial liability. Amounts classified as a financial liability are subsequently remeasured to fair value with changes in fair value recognised in profit or loss. If the business consideration is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date. Any gains or losses arising from such remeasurement are recognised in profit or loss or other comprehensive income, as appropriate.

### ***Leases***

Our lease asset classes primarily consist of leases for land, buildings and equipment. We assess whether a contract contains a lease, at inception of the contract. Ind AS 116 defines a lease as a contract, or a part of a contract, that conveys the right to use an asset (the underlying asset) for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, we assess whether: (i) the contract involves the use of an identified asset (ii) we have substantially all of the economic benefits from use of the asset through the period of the lease and (iii) we have the right to direct the use of the asset. At the date of commencement of the lease, we recognise a right-of-use asset and a corresponding lease liability for all lease arrangements in which we are a lessee, except for leases with a term of twelve months or less (short term leases) and low value leases. For these short-term and low value leases, we recognise the lease payments as an operating expense on a straight-line basis over the term of the lease. The lease payments are discounted using the interest rate implicit in the lease. If the rate cannot be readily determined, which is generally the case for our leases, the lessee's incremental borrowing rate is used, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions.

To determine the incremental borrowing rate, we:

- where possible, use recent third-party financing received by the individual lessee as a starting point, adjusted to reflect changes in financing conditions since third-party financing was received.
- use a build-up approach that starts with a risk-free interest rate adjusted for credit risk for leases held by the Group, which does not have recent third-party financing.

- make adjustments specific to the lease.

If a readily observable amortising loan rate is available to the individual lessee (through recent financing or market data) which has a similar payment profile to the lease, we use that rate as a starting point to determine the incremental borrowing rate. The lease liability is initially measured at amortised cost at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates. Right-of-use assets are generally depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis. If we are reasonably certain to exercise a purchase option, the right-of-use asset is depreciated over the underlying asset's useful life. Refer note 1(ii)(f) for the other accounting policies relevant to leases.

### **Trade receivables**

Trade receivables are amounts due from customers for services performed in the ordinary course of business and reflect our unconditional right to consideration (that is, payment is due only on the passage of time). Trade receivables are recognised initially based on the transaction price as they do not contain significant financing components. We hold the trade receivables with the objective of collecting the contractual cash flows and therefore measure them subsequently at amortised cost using the effective interest method, less loss allowance for credit impairment.

### **Financial assets**

- **Classification of financial assets at amortised cost:** We classify our financial assets at amortised cost only if both of the following criteria are met:
  - Asset is held with a business model whose objective is to collect the contractual cash flows.
  - The contractual terms give rise to cash flows that are solely payments of principal and interest.

Financial assets classified at amortised cost comprise trade receivables, bonds, debentures and government securities.

- **Classification of financial assets at fair value through other comprehensive income (FVOCI):** Financial assets at FVOCI comprise:
  - Equity securities (listed or unlisted) which are not held for trading, and for which we have irrevocably elected at initial recognition to recognise changes in fair value through OCI rather than profit or loss. These are strategic investments and we consider this classification to be more relevant.
  - Debt securities where the contractual cash flows are solely principal, and interest and the objective of our business model is achieved both by collecting contractual cash flows and selling financial assets.
- **Classification of financial assets at fair value through profit or loss (FVTPL):** We classify the following financial assets at FVTPL:
  - Debt investments (Mutual funds) that do not qualify for measurement at either amortised cost or FVOCI.
  - Equity instruments for which the entity has not elected to recognise fair value gains and losses through OCI.

### **Property, plant and equipment (including Capital Work in Progress)**

Freehold land is carried at the historical cost of acquisition. All other items of property, plant and equipment are stated at historical cost less depreciation. Cost comprises purchase price and any initial directly attributable cost of bringing the asset to its working condition for its intended use.

### **Depreciation methods, estimated useful lives and residual value**

Depreciation is calculated using the straight-line method to allocate their cost, net of their residual values, over their estimated useful lives as prescribed in Schedule II of the Companies Act, 2013 except in respect of certain categories of assets, where the useful life of the assets has been assessed based on the management's technical evaluation. The estimated useful lives are as mentioned below:

| Block of Asset                                  | Useful life   |
|-------------------------------------------------|---------------|
| Building                                        | 60 years      |
| Furniture and fixture                           | 5 to 10 years |
| Office equipment                                | 4 to 5 years  |
| Electrical equipment & installations            | 10 years      |
| Computer systems - office automation and others | 3 to 4 years  |
| Telecommunication systems                       | 4 years       |
| Trading systems                                 | 4 years       |
| Clearing & Settlement Systems                   | 4 years       |
| Motor Vehicle                                   | 4 years       |

The useful lives for computer systems office automation, computer systems – others, telecommunication systems, trading systems and clearing & settlement systems have been determined based on technical evaluation done by the management's expert which are lower than those specified by Schedule II to the Companies Act, 2013, in order to reflect the actual usage of the assets. We believe that the technically evaluated useful lives, different from Schedule II of the Companies Act, 2013, best represent the period over which these assets are expected to be used. The residual values are not more than 5% of the original cost of the asset. The assets' residual values and useful lives are reviewed at the end of each reporting period and adjusted on a prospective basis if appropriate.

### ***Investment properties***

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by us, is accounted as investment property. Investment property is measured initially at its cost, including related transaction costs. Investment properties are depreciated using the straight-line method over their estimated useful lives. Investment properties generally have an estimated useful life of 60 years. The useful life has been determined based on technical evaluation performed by the management expert.

### ***Intangible assets***

Intangible assets purchased are measured at cost as of the date of acquisition, as applicable, less accumulated amortisation and accumulated impairment, if any.

- (i) *Goodwill*: Goodwill represents the excess of purchase consideration over the fair value of the net identifiable assets acquired as of the date of acquisition. Goodwill on acquisitions of business and subsidiaries is included in intangible assets. Goodwill is not amortised, but it is tested for impairment annually, or more frequently if events or changes in circumstances indicate that it might be impaired and is carried at cost less accumulated impairment losses. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold. Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose. The units or groups of units are identified at the lowest level at which goodwill is monitored for internal management purposes, which in our case are the operating segments.
- (ii) *Other intangible assets*: Costs associated with maintaining software programmes are recognised as an expense as incurred. Development costs of internally generated intangible assets that are directly attributable to the design and testing of identifiable and unique software products controlled by us are recognised as intangible assets when the following criteria are met:
  - it is technically feasible to complete the software so that it will be available for use;
  - management intends to complete the software and use or sell it;
  - there is an ability to use or sell the software;
  - it can be demonstrated how the software will generate probable future economic benefits;
  - adequate technical, financial and other resources to complete the development and to use or sell the software are available; and
  - the expenditure attributable to the software during its development can be reliably measured.

Directly attributable costs that are capitalised as part of the software include employee costs and an appropriate portion of relevant overheads. Research expenditure and development expenditure that do not meet the criteria in (ii) above are recognised as an expense as incurred. Development costs previously recognised as an expense are not recognised as an asset in a subsequent period. Capitalised development costs are recorded as intangible assets and amortised from the point at which the asset is available for use. Computer software is amortised over a period of 4 years.

#### *Material civil litigation*

1. MCX Stock Exchange Limited, now the Metropolitan Stock Exchange of India Limited (“**Complainant**”), filed a complaint with the Competition Commission of India (“**CCI**”) on November 16, 2009 against our Company and others, alleging, among others, that our Company held a dominant position in the stock exchange service market and had abused that position by engaging in predatory pricing in the currency derivatives segment. The CCI, through an order dated June 23, 2011 (“**CCI Order**”), held, among others, that our Company held a dominant position in the market for stock exchange services in the currency derivatives segment and had abused such dominant position under Section 4 of the Competition Act by engaging in unfair pricing and imposed a penalty of ₹555.00 million, being 5% of the average turnover of our Company for the last three years. Our Company challenged the CCI Order before the erstwhile Competition Appellate Tribunal (“**COMPAT**”), which through an order dated August 5, 2014 (“**COMPAT Order**”), set aside certain parts of the CCI Order but upheld the finding of abuse of dominance and the penalty imposed against our Company. Consequently, our Company filed a civil appeal dated September 16, 2014 (“**SC Appeal**”) before the Supreme Court of India (“**SC**”) to set aside the COMPAT Order and to stay its operation pending disposal of the SC Appeal. The SC, through an order dated September 23, 2014, granted an interim stay on recovery of the penalty amount. Subsequently, the Complainant filed a compensation application dated September 2, 2014 which was amended on January 6, 2015, before the COMPAT, claiming an amount of ₹8,569.90 million along with interest at the rate of 18% p.a. until the realisation of the claim (“**Compensation Application**”) to which our Company filed its preliminary reply on May 29, 2015. Pursuant to the Finance Act, 2017, the Compensation Application was transferred to the National Company Law Appellate Tribunal (“**NCLAT**”). Our Company filed an interim application dated December 12, 2017 before the SC, seeking a stay of the compensation proceedings before the NCLAT. The SC, through an order dated February 12, 2018 (“**Stay Order**”), stayed the compensation proceedings before the NCLAT during the pendency of the SC Appeal. Thereafter, recording the SC’s directions, the NCLAT, through an order dated March 8, 2018, adjourned the compensation proceedings without assigning a specific date for the next hearing. The Complainant filed an application on July 12, 2026, to seek a vacation of the Stay Order. The next date of hearing for the SC Appeal is December 15, 2026. The matter is currently pending.

The Calcutta Stock Exchange Limited (“**CSE**”) and another (collectively, “**Petitioners**”) filed a writ petition dated August 14, 2023 (“**Petition**”), under Article 226 of the Constitution of India, before the High Court at Calcutta (“**Court**”), against SEBI, our Company, our Managing Director and Chief Executive Officer and others (collectively, “**Respondents**”), challenging, among others, our Company’s letter dated July 18, 2023

(“**Letter**”) seeking withdrawal and termination of the agreement dated September 28, 2011 entered into for the establishment of a trading arrangement between CSE and our Company under Section 13 of the SCRA (“**Agreement**”), as well as SEBI’s rejection dated July 31, 2023 of CSE’s request to enter into an inter-central counterparties agreement with our Subsidiary, NSE Clearing Limited. The Petitioners alleged that the direction issued by SEBI dated October 11, 2021 to our Company and BSE to jointly inspect CSE was impermissible under Section 13A of the SCRA. The Petitioners sought the Court to pass orders, among others, declaring that the Letter and the cancellation of the Agreement were unconstitutional and directing our Company to restore the trading arrangement under the Agreement. By way of interim relief, the Petitioners sought a stay of the Letter and an injunction restraining the Respondents from acting upon the Letter pending disposal of the Petition. The Court through an order dated August 18, 2023 (“**Impugned Order**”), stayed the operation of the Letter. Consequently, our Company filed an intra-Court appeal on September 19, 2023, before the Court against the Impugned Order and the Court, through an order dated November 16, 2023, set aside the Impugned Order. The Petitioner alleged that the selection of October 11, 2021, as the cut-off date was arbitrary and without rational nexus. The Petitioner has sought, among others, a writ of declaration, declaring the Circular as illegal, arbitrary, perverse insofar as it directed trading members to refund penalties only in respect of amounts passed on to clients after October 11, 2021. The Court, through an order dated October 14, 2024 (“**Impugned Order**”), allowed the Petition, quashed the stipulation relating to the cut-off date under the Circular, set aside the Grievance Redressal Committee (“**GRC**”) order dated March 31, 2023, which had directed a trading member to pay ₹ 28.90 million to investors, including the Petitioner, on the basis of the cut-off, and restored the matter to the GRC for adjudication from the beginning. Consequently, our Company filed a writ appeal dated February 26, 2025, before the Division Bench of the High Court of Madras, seeking the Impugned Order to be set aside. The Court through an order dated March 13, 2025, granted an interim stay of the Impugned Order. The matter is currently pending.

For further details in relation to the Settlement Order, see “-Details of resolved enforcement actions previously undertaken by SEBI against our Company – 9.”. The Petitioner alleged, among others, that the Trading Access Point software created unfair market access advantage in favour of selected trading members and that the Settlement Order is in violation of Article 14 of the Constitution of India. The Petitioner has sought, among others, a writ of certiorari to call for the records and quash the Settlement Order, and a stay on the effect, implementation and operation of all further proceedings consequent to the Settlement Order, pending disposal of the Petition. However, only 500 Equity Shares were credited to his demat account. Pursuant to a bonus issue by our Company in the ratio of 4:1 on November 4, 2024, the alleged 500 undelivered Equity Shares now correspond to 2,000 Equity Shares, and the Petitioner alleged that he has also been deprived of dividends accruing on Equity Shares arising from the bonus issue. Separately, IIFL initiated arbitration against the Petitioner under bye-laws of our Company to recover the debit balance of the Shares and pursuant to directions of the High Court of Bombay, our Company constituted an arbitral tribunal wherein the arbitral tribunal and subsequently the appellate tribunal through orders dated August 1, 2025 and December 9, 2025, respectively (“**Orders**”), directed the Petitioner to pay ₹ 2.61 million. Aggrieved by the Orders, the Petitioner filed the Petition alleging, among others, that our Company unilaterally constituted and administered an arbitral tribunal under its own bye-laws despite the matter being sub judice before the Commission. 6. The Court of Chief Commissioner of Persons with Disabilities, Delhi (“**CCPD Court**”) took suo-moto cognizance of the inaccessibility of websites, mobile applications and other digital platforms of various establishments in India and issued a notice dated March 28, 2023 to our Company. Our Company through its letter dated June 2, 2023, informed the CCPD Court of its compliance with web accessibility standards and the appointment of an IAAP-certified auditor. The CCPD Court separately passed an order dated June 20, 2025 (“**Impugned Order**”) imposing a penalty of ₹0.05 million on our Company and others for non-compliance with web accessibility standards. Subsequently, our Company filed an application dated June 27, 2025 (“**Application**”) before the CCPD Court for exemption from the Impugned Order submitting among others, that (i) the imposition of a statutory penalty without service of notice at the correct address and without

affording a reasonable opportunity to be heard constitutes a violation of the principles of natural justice; and (ii) our Company had already appointed an IAAP-certified auditor and obtained a compliant audit report. The CCPD Court through an interim order dated August 15, 2025 (“**Interim Order**”), while classifying our Company under the category of ‘fully compliant / submitted final audit’ establishments with no fines imposed at that stage, also observed that there was no documentary evidence of the appointment of an IAAP-certified auditor or any audit report on the record of the CCPD Court. Consequently, our Company through a letter dated September 12, 2025, responded that the Interim Order was factually erroneous as the Application along with all supporting documents, including the appointment of the IAAP-certified auditor and the audit report dated July 19, 2024, had already been submitted and accordingly sought the CCPD Court to (i) take the IAAP-certified audit report dated July 19, 2024 on record; (ii) exempt/waive the penalty imposed through the Impugned Order; and (iii) modify the Interim Order to reflect that our Company was in compliance with web accessibility standards. The matter is currently pending.

#### **NSE Clearing Limited (“NCL”)**

National Securities Clearing Corporation Limited (*now NSE Clearing Limited*) filed a criminal application dated May 8, 2013 (**“Criminal Application”**), before the High Court of Bombay (**“High Court”**) against the State of Maharashtra (through the Economic Offences Wing, Mumbai (**“EOW”**)), Prime Broking Company (India) Limited (**“Prime Broking”**), Sarvin Mercantile Private Limited (**“Sarvin”**) and Trusha Infrastructure Private Limited (**“Trusha”**), seeking, among others, quashing of the an order dated April 27, 2013 (**“Order”**) passed by EOW. The Order directed NCL to freeze 1,300,000 and 700,000 shares of Gitanjali Gems Limited (**“Gitanjali Shares”**) belonging to Trusha and Sarvin, respectively (**“Frozen Shares”**), treating them as suspected crime proceeds, until receipt of an order from a competent court. Prime Broking, a clearing member of NCL, had executed a deed of pledge dated February 15, 2003, pursuant to which, between July and December 2012, Prime Broking pledged 2,000,000 Gitanjali Shares with NCL as collateral and later, failed to replace excess non-cash collateral, resulting in a margin shortfall of approximately ₹ 920.00 million, following which NCL commenced selling of the pledged Gitanjali Shares and sold 297,731 shares between March 19, 2013 and March 22, 2013. Sarvin and Trusha, who had purchased 1,100,000 and 1,300,000 Gitanjali Shares, respectively, through Prime Broking and funded the same through loan agreements with Primesec Investments Limited, in their complaint dated March 13, 2013, before the EOW alleged that the shares had not been duly transferred to their demat accounts and that Prime Broking had purportedly created a security interest over their shares in favor of NCL without their authority. Pursuant to which, the EOW issued the Order. Further, during the pendency of the Criminal Application, the High Court passed an interim order dated May 10, 2013 (**“Interim Order”**), directing Sarvin to obtain an order from the competent court to stay the sale or disposal of Frozen Shares. Sarvin and Trusha challenged the Interim Order before the Supreme Court of India, which passed an order dated May 22, 2013 directing that the Frozen Shares shall not be transferred and requested expeditious disposal of the Criminal Application. Thereafter, the High Court passed its final order dated August 22, 2013 (**“Impugned Order”**), dismissing the Criminal Application and holding that NCL had an efficacious alternate remedy before the magistrate and found no illegality in the Order. Consequently, NCL filed a Special Leave Petition (Criminal) dated October 17, 2013 (**“SLP”**) under Article 136 of the Constitution of India before the Supreme Court of India, contending among others, that the High Court erred in dismissing the Criminal Application on the ground of alternate remedy. During the pendency of the SLP, NCL submitted that the value of the Frozen Shares had eroded significantly, from approximately ₹ 1,194.00 million in March 2013 to approximately ₹ 70.00 million by July 2015. The Supreme Court of India has passed an order dated September 18, 2015, allowing the interim relief of disposing the Pledged Securities, without prejudice to the rights and contentions of any of the parties and further directed to deposit the sale proceeds in the registry of the Supreme Court of India, to be kept in a fixed deposit, for a period of one year in the first instance. The matter is currently pending.

| 4.      | July 3, 2018, and September 12, 2018                                      | Our Company received two show cause notices from SEBI, one under Sections 11 and 11B of the SEBI Act, and another under Rule 4(1) of the SEBI Adjudication Rules, in relation to governance-related issues concerning the manner in which our Company awarded certain contracts for research and development of software and for data sharing. The WTM, through an order dated April 30, 2019, passed certain non-monetary directions against our Company (" <b>WTM Order</b> "). The AO, through an order dated June 30, 2022, imposed a penalty of ₹10.00 million against our Company (" <b>AO Order</b> "). Our Company filed appeals against both the WTM Order and the AO Order (collectively, the " <b>Appeals</b> "). However, the Appeals were withdrawn by our Company pursuant to the SAT order dated July 24, 2024. Post withdrawal of the Appeals, our Company has paid the amount of ₹12.44 million, including an interest of ₹2.44 million on July 29, 2024, towards the compliance with the AO Order. Further, the Company has complied with the non-monetary directions to the extent applicable under the WTM Order and updated SEBI about the status of compliance from time to time. One of the non-monetary directions under the WTM Order was to take necessary action against certain noticees for violating the provisions of the 'Professional Service Agreement' and for alleged misuse of data. These noticees have filed separate appeals (" <b>Appeals</b> ") before the SAT against the SEBI order dated April 30, 2019 (" <b>Order</b> ") arising out of similar facts and circumstances. The SAT, through an order dated May 7, 2019, stayed the effect and operation of the said Order. The Appeals are pending before the SAT. Accordingly, any further action towards these noticees by our Company shall be subject to the outcome of the appeals filed by these noticees. Further, the SAT through an order dated August 20, 2026, directed to array our Company as a party respondent to the Appeals. |

### **Phased implementation of Unified Payments Interface**

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of *inter alia*, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

**Phase I:** This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended until June 30, 2019. Under this phase, a RIB had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

**Phase II:** This phase became applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Subsequently, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 had extended the timeline for implementation of UPI Phase II until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continued to be six Working Days during this phase.

**Phase III:** This phase became applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023 vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023. In this phase, the time duration from public issue closure to listing has been reduced to three Working Days.

Pursuant to the SEBI ICDR Master Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the SEBI ICDR Master Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalized under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as BRLMs will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public issues shall also provide the facility to make applications using UPI. Our Company will be required to appoint Sponsor Banks to act as conduits between BSE and NPCI in order to facilitate collection of requests and/ or payment instructions of the UPI Bidders using the UPI. Further, pursuant to the SEBI ICDR Master Circular, all individual investors applying in public issues where the application amount is up to ₹0.50 million shall use UPI and shall also provide their UPI ID in the Bid cum Application Form submitted with any of the entities mentioned herein below:

- a. syndicate member;
- b. a stock broker recognised with a registered stock exchange (and whose name is mentioned on the website of the stock exchange as eligible for this activity);
- c. a depository participant (whose name is mentioned on the website of the stock exchange as eligible for this activity); and
- d. a registrar to an issue and share transfer agent (whose name is mentioned on the website of the stock exchange as eligible for this activity)

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the SCSBs only after such banks provide a written confirmation, in compliance with the SEBI RTA Master Circular in a format as prescribed by SEBI, from time to time. Further, in accordance with the SEBI ICDR Master Circular, the payment of processing fees to the SCSBs shall be undertaken pursuant to an application made by the SCSBs to the BRLMs, and such application shall be made

only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB.

For further details, refer to the General Information Document available on the websites of the Stock Exchange, the BRLMs and the M-BRLM.

While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Foreign investment is permitted (except in the prohibited sectors) in Indian companies, either through the automatic route or the approval route, depending upon the sector in which foreign investment is sought to be made. The Government of India makes policy announcements on FDI through press notes and press releases. The regulatory framework, over a period of time, thus, consists of acts, regulations, press notes, press releases, and clarifications among other amendments. The DPIIT (formerly Department of Industrial Policy & Promotion) issued the Consolidated FDI Policy Circular dated October 15, 2020, with effect from October 15, 2020 (the “**FDI Policy**”), which consolidates and supersedes all previous press note, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular. For further details, see “*Key Regulations and Policies*” beginning on page 240.

Pursuant to the FDI Policy, FDI of up to 49% of the paid-up share capital is permitted under the automatic route in our Company. Further, the SECC Regulations states that, subject to the limits as otherwise prescribed by the Central Government from time to time, the combined holding of all persons resident outside India in the paid up equity share capital of a recognised stock exchange cannot exceed, at any time, 49% of its total paid up equity share capital.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI Policy and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI.

On October 17, 2019, Ministry of Finance, Department of Economic Affairs, had notified the FEMA Rules, which had replaced the Foreign Exchange Management (Transfer and Issue of Security by a Person Resident Outside India) Regulations 2017. Foreign investment in this Offer shall be on the basis of the FEMA Rules. In terms of Press Note 3 of 2020, dated April 17, 2020 (“**Press Note**”), issued by the DPIIT, the FDI Policy and the FEMA (Non-debt Instruments) Rules has been amended to state that all investments under the foreign direct investment route by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country will require prior approval of the Government of India. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government of India. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India. Further, in accordance with the amendment to the Companies (Share Capital and Debentures) Rules, 2014 vide notification dated May 4, 2022 issued by Ministry of Corporate Affairs, a declaration shall be inserted in the share transfer form stipulating whether government approval shall be required to be obtained under Foreign Exchange Management (Non-debt Instruments) Rules, 2019 prior to transfer of shares, as applicable. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Offer Period. Subsequently, *vide* Press Note No. 2 (2026 Series), dated March 15, 2026 issued by the DPIIT, the Consolidated FDI Policy has been further amended to, *inter alia*, define the expression “beneficial owner” and to provide that prior approval of the Government of India shall be required only where citizen(s) and/ or entity(ies) of a country sharing a land border with India have the ability to, directly or indirectly, individually or cumulatively, independently or collectively, whether acting together or otherwise, hold rights/entitlements more than 10% of the shares, capital or profits of the investor entity which is incorporated or registered in a country other than a country sharing land border with India, or exercise control over such investor entity, or exercise ultimate effective control over the investee entity in any manner. The amendments under Press Note No. 2 (2026 Series) have come into effect as on the date of this Red Herring Prospectus.
